WAR SUMMARY OF THE LATEST EVENTS

Nothing official has yet been given out regarding the Russian expedition to Bulgaria, which Athens states set out for the Bulgarian coast from Odessa Wednesday morning. The point at which the landing is expected to be made in Varna, the chief Bulgarian port on the Black Sea and the eastern terminal of the railway system of northern Bulgaria. There is an alternative possibility—Burgas, on the gulf of the same name, which is the principal port south of the Balkans, and has railway connection to Sofia. If the intention of the Russians is to join hands with the armies of France and Britain in Eastern Rumelia or Thrace, and thus interpose a barrier between the Germans and Constantinople, Burgas will be a more suitable landing place than Varna. The chief objection to a Russian landing south of the Balkans is that Turkish troops could be quickly brought up to the aid of the Bulgars, whereas if the Russian landing is made at or near Varna the Turk will not be able to assist the Bulgar in resisting it. Landing at Varna would have no direct bearing on the war in Serbia. Nish is three hundred miles west of Varna, and some of the most difficult country in Europe lies between. A landing there, however, would render necessary the retention of large Bulgarian forces on the Black Sea coast and greatly lessen the Bulgarian striking power on the Serbian frontier.

A curious story, which may prove important, comes from Rome. Greek troops, it is stated, were recently withdrawn from the proximity of the Bulgarian frontier in order to avoid the possibility of a conflict. Taking advantage of this lands of Bulgarians are now reported to be raiding Greek territory in the direction of the River Vardar at a point adjoining the Serbian frontier. Greek troops have been sent in pursuit of the marauders. In the Balkans there are always powder barrels lying around. The Bulgarians appear to be very careless in their use of matches.

Of actual fighting on the Danube and on the eastern Serbian front there are few details. The Serbs claim that the Germans lost very heavily in the operations around Belgrade, and that they have been unable to capture the heights dominating the city. Berlin writers on military topics tell their readers that the campaign will not be exactly a procession, and that stiff fighting is certain before the way is opened to Constantinople. The Serbian official report, issued at Nish on Tuesday, but delayed in transit, states that along the Danube there was fierce fighting on Monday and Tuesday, particularly at Semendria and south of Gradiste. The enemy, it is stated, succeeded in occupying Semendria and Lipa, but at heavy cost. "There has

ONTARIO BARS TO BE CLOSED AT 8 O'CLOCK AFTER NOV.

Commencing Monday, Nov. 1, Ontario hotel bars must close at 8 o'clock, except on Saturday evening, when as usual they will close at 7. For many weeks the provincial government and the Ontario Liquor Commission have had under consideration ways and means of reducing to a minimum drinking among soldiers during the winter, and Wednesday night the final decision of the commission, endorsed by the Ontario Cabinet, was made known.

The finding of the commission was placed in the form of the following resolution:

Whereas a state of war now exists in the results of which the British Empire is vitally interested.

And whereas it has become apparent, especially during the past few months, that the cost of the war will be enormous, and that in every portion of the Empire it is desirable both on the patriotic and other ground, that steps should be taken to reduce within reasonable limits during the period of the war all necessary expenditures on the part of the general public.

And whereas the daily consumption of liquor as a beverage is an expense which ought to be modified during the present critical times, and in the opinion of this board, it is desirable in order to assist in accomplishing this object that the hours of sale of liquor in the bar-rooms and hotels of the province should be reduced.

And whereas in the opinion of this board it is wise and prudent that a way of experiment every hotel bar in this province should be closed at the hour of eight o'clock in the afternoon on every day in the week other than Saturday.

Therefore, be it resolved that, notwithstanding any statutory provision to the contrary, no liquor shall be sold in any licensed tavern in this province upon any day of the week after the hour of eight o'clock in the afternoon, but this resolution shall not be construed to interfere with the statutory provision respecting the hour of closing on Saturday.

This resolution shall go into effect on Monday, the first day of November next, and shall thenceforth continue in full force and effect during the period of the war in which His Majesty's forces are now engaged.

This is copy of resolution passed by the board of license commissioners for Ontario on the 13th of October 1915.

of the ratepayers of the Town of Napanee is called for

Monday Evening,

October 18th, 1915

at the hour of 8 p.m. sharp,

for the purpose of discussing the question of the Canadian Northern Railway Station site and other matters of importance.

A large attendance is requested.

By order.

W. A. GRANGE,
Clerk.

NEWBURGH.

At the annual meeting of the members of the Newburgh Red Cross Society the secretary reported that since March 1st the branch had sent fifteen cases of socks, shirts etc., valued at \$1,000 to the head office at Toronto. The Treasurer reported the collection of \$547.01 which was spent as follows: Paid for supplies \$297.01, sent to Napanee towards motor ambulance \$50.00, sent to Toronto for coats and medical supplies \$200.00.

The following officers were elected for the ensuing year:

Hon. president—Joseph Paul.
Hon. vice presidents—Rev. J. Gaudier, Rev. R. W. Spencer, Rev. E. Farnsworth, Rev. Father McCarthy.
President—H. M. Ryan.
Hon. treasurer—H. R. McHoull.
Hon. secretary—Mrs. F. Emma Shorey.
Assistant secretary—Miss Lillite Gaudier.
Vice president—Mrs. J. W. Courtney.

Committee—Mesdames, Aylsworth, Adams, Sutton, Dickson, Ramsay, Gehan, Fitzmartyn, Madden, Nugent and Williams and Messrs. Hill, Dunwoodie, O'Connor and Dougan.

Supply Committee—Mesdames, Thomson, Walker, Dunwoodie, Sutton, Winter and Haines.

Leave your order for Betty Brown Home-made Chocolates, the most delicious chocolate made. Ordered fresh every week. The most talked of Chocolates in Toronto. Sold in Napanee at WALLACE'S Drug Store only.

few details. The Serbs claim that the Germans lost very heavily in the operations around Belgrade, and that they have been unable to capture the heights dominating the city. Perlin writers on military topics tell their readers that the campaign will not be exactly a procession, and that stiff fighting is certain before the way is opened to Constantinople. The Serbian official report, issued at Nish on Tuesday, but delayed in transit, states that along the Danube there was fierce fighting on Monday and Tuesday, particularly at Semendria and south of Gradiste. The enemy, it is stated, succeeded in occupying Semendria and Lipa, but at heavy cost. "There has been no action since," it is added, "as the enemy had such heavy losses; the battlefield is covered with bodies."

The midnight French official report tells of another fierce but unsuccessful German attack upon the French lines in the woods to the northeast of Souchez and farther south near the cross roads of the Vimy ridge. The attack was preceded by a prolonged bombardment, but, notwithstanding this and the extreme violence of the repeated assaults, the enemy were unable to penetrate the French lines at any point save in certain parts of trenches in the "Givenchy Woods, which had been completely ploughed up by heavy shells. Everywhere else the French held their trenches and repulsed the assault, inflicting heavy losses on the enemy.

The German position around Lens must be desperate. Only the fear that from the ridges now held by them the French will concentrate an irresistible fire against Lens, which will make evacuation necessary, could justify the loss of life in these repeated endeavors to recover the lost ground around Souchez, Givenchy and Vimy. The British trenches north of Lens draw even nearer to the town, and the French hold their lately won gains with tenacity beyond all praise. A big victory at Lens, involving even Lille itself appears to be within reach.

There has been another tremendous artillery duel in the Champagne as a result of the recent increase in the German artillery there. The French guns have still the upper hands, and Wednesday, while they held the German in check, the French infantry were making progress from trench to trench at a point to the east of the earthwork known as La Trapeze. In the Vosges the Germans gained a footing in a French trench some 60 to 80 yards long south of the Linkeopel. An all-day battle preceded this gain, and in it the Germans lost far more heavily than the French. The recent losses of the enemy on the western front have been upon a prodigious scale, and must have made necessary the reinforcement of the German armies in Champagne and Artois to the extent of 200,000 men or more.

Dark London proves as easy to find as the London that was brilliantly lighted. It is announced that in a Zeppelin raid over London Wednesday night eight persons were killed and 34 injured. The coming of winter's gales will make the Zeppelins more cautious in venturing across the North Sea. The elements will provide a more effective check than the aeroplane and artillery defences of London, which have not been a brilliant success.

Even the German reports of operations on the Russian front no longer gloss over the fact that the Russians are forcing the fighting. Von Hindenburg says that west of Bivinsk "a Russian attack broke down," and that "Russian troops attacked northeast of Smorgon, but were repulsed." The Dwina campaign must be added to the list of Von Hindenburg's failures.

In Galicia the Russians have pierced the Stripsa defences and driven the

hour of closing on Saturday.

This resolution shall go into effect on Monday, the first day of November next, and shall thenceforth continue in full force and effect during the period of the war in which H. Majesty's forces are now engaged.

This is copy of resolution passed by the board of license commissioners for Ontario on the 13th of October 1915.

A QUERY!

TO THE EDITOR OF THE EXPRESS:—

Sir—In our Tax Demands just received, I note one item, viz.: Provincial War Tax, six mills on the dollar and am naturally anxious to know why our Provincial Government strikes Napanee so hard, especially when I notice that in other municipalities the Provincial War Tax is on one mill on the dollar. Can this be modern and improved method of obtaining money under false pretence or is Napanee so patriotically blir that satan in khaki looks like an angel?

CITIZEN.

Napanee, Oct. 13th.

If 'Citizen' will read his tax bill over again carefully, he will find that the War Tax is .6 mills or 6-10 of mill on the dollar.—Editor.

MILL HAVEN.

On Friday morning last, Mrs. D. C. Forward passed quietly away at the home of her son, Charles Forward Mill Haven. The deceased was over ninety years old and had been a resident of Mill Haven most of her life. The funeral was held on Sunday and was largely attended by relatives and friends. Rev. Mr. Sexsmith officiated. Frederick Clement and family, Treton, are visiting at William Arnstrong's.

Mrs. Charles Forward spent last week in Kingston.

A. Miller is repairing his home.

NEWBURGH.

John Alesworth has gone to Kingston to attend Queen's College.

Charles Lochhead, brother of J. I. Lochhead, of this village, is in the General Hospital Kingston, under treatment with but slight hopes of recovery.

The two sons of Mrs. Henry Pau who are in England, have received promotion. They are both doctors.

Mrs. Gehan spent a few days last week with her sister, Mrs. Charles Ingoldsby, Centerville West.

The annual meeting of the member of the Newburgh Red Cross Society was held in the Standard Ball hall on Wednesday evening, Sept. 28th. The same officers were elected for the ensuing year.

FIVE DOLLARS IN GOLD.

last of the Austrians across the line along the line of the advance from Trembowla. General Ivanoff's cavalry following up the victory, and the Austrians are not likely to make much of a stand till they reach the Zlot Lipa. There they will be only forty miles from Lemberg. The Russian grip on southeastern Galicia has never been relaxed altogether, and now it is tightening again daily. Ivanoff's advance is endangering the German and Austrian forces—in all that part of Russia south of the Pripiet marshes and east of the Bug—whose communications depend upon the railway line running northeast from Lemberg. Petrograd believes that the victory on the Stripsa will force Von Linsingen to regroup his entire army. The defeat and partly dispersed force number about 60,000.

PROPOSED NEW STATION FOR C. N. RAILWAY

The Canadian Northern Railway has submitted plans of a new station, and of a new location for the building.

The proposed building is very similar to the brick station erected by the company at Deseronto, but is to have an extra elevation of three feet.

The proposed situation is about 750 feet on the C.N.R. main line west of the G.T.R. track. The freight offices and shed will remain where at present located. The Company propose that the town of Nanawake open up Ann street westerly for a couple of blocks or all the way through to the Belleville road, and this road would be intersected and another road constructed northerly to the railway site. The plans of the building, and the site are on file and may be seen at the clerk's office. The cost to the town of securing the lands for the opening up of the proposed streets, grading them and building cement walks, would be in the neighborhood of from \$2500.00 to \$3000.00. The question of fixing a site is a very important matter to every ratepayer, as the station when erected will be there probably for all time. A public meeting to discuss the situation will be held in the town hall, on Monday evening, at 8 o'clock sharp, and it is hoped that all citizens will make a careful survey and study of the whole problem, and will come to the meeting prepared to discuss the matter. Now is the time to come forward and publicly give expression to your views, and assist the council in coming to a proper conclusion.

WHIRLWIND CAMPAIGN

A public meeting was held in the town hall on Tuesday evening for the purpose of organizing a campaign for funds on behalf of the British Red Cross Society. It was decided the request of this Society made to the whole British Empire and made especially to us by the Honorable, Sir John Hendrie, Lieutenant Governor, could not be ignored, and that Trafalgar Day, Oct. 21st, be set aside for the purpose when a systematic canvass be made. The following committee was appointed:—

W. S. Herrington, K.C.—Chairman.
W. J. Dollar—Secretary.
F. F. Miller—Treasurer.

These officers to be also the executive committee with power to add to their numbers. About 25 captains who are to make the canvass were named, and T. G. Carscallen, M.P., Rev. C. E. Cragg and Rev. J. H. H. Coleman were appointed to notify the several captains and get their assent to the proposed personal canvass.

The town will be divided into blocks and territory assigned to each Captain. The captains themselves can arrange with others to assist them in

ENEMY'S LOSSES HUGE

Attempt to Retake Loos Cost
Germans 38,000 Men.

Enormous Numbers Sacrificed in Val-
Attempt to Recover Territory
Captured by Allies in First Rus-
—Further Gains Are Reported
Champagne and in Artois — No
Footholds Gained by the French

PARIS, Oct. 12.—The German at-
tempts to retake the ground won
from them by the British and French
in the vicinity of Loos, attempts in
which enormous numbers of men
have been sacrificed, have failed com-
pletely, according to a War Office
communiqué issued Monday after-
noon.

After several days of almost con-
stant fighting between seven or
eight thousand German soldiers killed
in front of the position which the
French and British forces cap-
tured in this vicinity during the re-
cent offensive. Their wounded num-
bered more than 30,000 men.

In Champagne, where the French
troops are still driving ahead, gain
of the first consequence were made
Monday. The entire German defence
work south-east of Tahure was cap-
tured by a brilliant assault. Progress
was made north-east of the village.

Very perceptible progress has also
been made in Artois, where ground
has been gained in the wood to the
west of the road from Souchez to
Angres.

The German works known as the
"Trapeze" — substantially opposit-
the very point where the German
have been attempting by bombard-
ment and by assault to dent the
French front and thereby further ex-
pose the newly-acquired advance
French position on Tahure Hill—was
the scene of what the Paris War Of-
fice terms "new and noticeable progress." More than 200 prisoners,
several machine guns, and a bomb
thrower were captured by the at-
tackers.

Simultaneously, the British in the
sector of Loos were likewise success-
ful, though theirs was a defensive
role. Gathering for the assault after
an intense bombardment from gun
of every calibre, with the fire concen-
trated on their recently-lost position
at Loos and at points immediately to
the north and south of there, the Ger-
mans launched an attack of excep-
tional violence against the British
works. The British stood firm and
met the assaults with a withering fire
from machine guns backed by artil-
lery and aided by unsparing use of
hand grenades and the bayonet in
close quarters. The German losses
were heavy, hundreds of bodies lying
in the British front when the last
wave of attackers finally was forced
back.

Albert Thomas, French Minister of
Munitions, who has just returned
from a visit to Lloyd George, declares
that the road to Berlin must be hewn
out by explosives. M. Thomas went
to England to arrange for the ex-
change of raw materials.

mand of the Allied forces in the Bal-
kans.

Delcassee's Son Imprisoned.

BERLIN, Oct. 12.—Lieut. Jacques
Delcassee, son of the French Foreign
Minister, who is a prisoner of war at
Halle, has been sentenced to deten-
tion for one year in the fortress for
having spoken abusively of Germany
and declined to obey orders.

Many cases of individuals charged
with having expressed anti-German
sentiments in Alsace have been heard
by a court-martial at Strassburg. The
Abbe Moreau of Wanzel, who, at a
meeting of councillors of the church
shouted "Vive la France" was sen-
tenced to eighteen months' imprison-
ment.

Woman Sentenced to Hang.

CLINTON, B.C., Oct. 12.—After an
hour's deliberation, the jury at the
Assizes here Thursday night found
Mrs. Elizabeth Coward guilty of the
charge of murdering her husband,
James Coward, on the family pre-
emption near Fort St. James on Sep-
tember 6 last.

She was sentenced to be hanged at
Kamloops December 23, the same day
on which Albert Lester Klinger will
face death for the murder of his partner,
Burton Smith, at a camp near
Fort George.

Naval Fight in Pacific.

MANILA, Oct. 12.—The Governor
of Palawan officially reports that at
10 o'clock on the morning of October
6 a vessel, followed by two others,
passed Cuyo Island, with the pursu-
ers bombarding. The fight continued
close to the shore. South of Cuyo
they all disappeared. The flags were
undiscernible. Government and
army and navy officials are investigat-
ing. It is believed here that the law
regarding the three-mile limit was
violated.

NEW AERIAL ARMY.

France Has Assembled an Imme-
nse Fleet of Aeroplanes.

PARIS, Oct. 12.—An aerial ar-
my is no longer a dream of roman-
ce. Such an army formed in divi-
sions and squadrons, with battle ae-
roplanes, cruiser aeroplanes, scout
and torpedo planes, all armed
heavily and carrying three-inch ca-
non and rapid-fire guns, is a reality.
It has been made possible through
the remarkable development of mi-
itary aviation in France.

The French Government has per-
mitted the first inspection of
new fleet of aeroplanes. Opportun-
ity was given to inspect the large
small types of the new battle ma-
chine and watch them as they were ma-
nœuvring high in the air, firing rou-
nd after round from their three-in-
ch rifles, while they soared, looped,
a darted about.

The Minister of War, Alexandre
Millerand, assigned two military ex-
perts of the staff of the aviation ser-
vice—Captain de Laffargue and Lieut.
Paruf—to conduct the correspon-
dents first to one point, the name
which may not be mentioned, where
the new fleet of battle craft had been
assembled, and later to the aviation
school at B—, where 100 mi-
itary aviators were learning to na-
vigate the new war craft.

SO FAR 2,000,000.

Six Million More Are Wounded
Missing, Says U. S. Expert.

WEST POINT, Oct. 12.—Since the
great war in Europe started more
than 2,000,000 men have been killed
the wounded number nearly 4,000,000,
while the total number of prisoners
and of the missing is more than
2,000,000. These are conservative
minimum figures compiled from the
best available data, and were made
public in Cullum Hall here by
Brigadier-General Francis Vint
Greene, U.S.A., retired, in an address
on the war, delivered before the
members of the New York State Hi-
storical Association.

General Greene is an honor gra-
uate of West Point of the class of
1870, and the author of many stan-
dard works on military history. He
gave his hearers the benefit of what
he called an "intelligent guess" as
the casualties of the war and sub-
mitted a table showing the increase
of the national indebtedness of the
European belligerents. The increase
over 1914 approximately is \$20,000,000,000.

Canadian Motors for Russia.

LONDON, Oct. 12.—General Bood
has decided to transfer to the Rus-
sian Government five hospital mot-
or cars donated by Canada. These have
been accepted in a special letter from
the Czar, who is sending a messenger
to receive them.

President and Fiancee.

WASHINGTON, Oct. 12.—Presi-
dent Wilson, accompanied by his fian-
cée, Mrs. Norman Galt, and mem-
bers of his family, left for New York
Friday, where the party was entertain-
ed by Colonel E. M. House, the Presi-
dent's close friend, Friday night at
theatre party, in honor of the an-
nouncement of the President's en-
gagement.

An unusually large crowd awaited
the President's arrival at the Union
Station, where the party boarded the
Presidential car. Many women were
in the throng, eager to catch a
glimpse of the engaged pair.

ENEMY'S LOSSES HUGE

Attempt to Retake Loos Cost Germans 38,000 Men.

Enormous Numbers Sacrificed in Vain Attempt to Recover Territory Captured by Allies in First Rush—Further Gains Are Reported in Champagne and in Artois—New Footholds Gained by the French.

PARIS, Oct. 12.—The German attempts to retake the ground won from them by the British and French in the vicinity of Loos, attempts in which enormous numbers of men have been sacrificed, have failed completely, according to a War Office communiqué issued Monday afternoon.

After several days of almost constant fighting between seven and eight thousand German soldiers held in front of the position which French and British forces captured in this vicinity during the recent offensive. Their wounded must be more than 30,000 men.

In Champagne, where the French troops are still driving ahead, gains of the first consequence were made today. The entire German defence line south-east of Tahure was captured by a brilliant assault. Progress was made north-east of the village.

Very perceptible progress has also been made in Artois, where ground has been gained in the wood to the east of the road from Souchez to Arras.

The German works known as the "apeze" — substantially opposite the point where the Germans have been attempting by bombardment and by assault to dent the British front and thereby further extend the newly-acquired advanced position on Tahure Hill—was the scene of what the Paris War Office terms "new and noticeable progress." More than 200 prisoners, several machine guns, and a bombardier were captured by the attackers.

Simultaneously, the British in the north of Loos were likewise successful though theirs was a defensive action.

Gathering for the assault after intense bombardment from guns very calibre, with the fire concentrated on their recently-lost positions and at points immediately to north and south of there, the Germans launched an attack of exceptional violence against the British lines. The British stood firm and the assaults with a withering fire of machine guns backed by artillery aided by unsparing use of hand grenades and the bayonet at the quarters. The German losses were heavy, hundreds of bodies lying in the British front when the last of the attackers finally was forced to retreat.

Herbert Thomas, French Minister of War, who has just returned from a visit to Lloyd George, declares the road to Berlin must be hewn by explosives. M. Thomas went to England to arrange for the exchange of raw materials.

STILL NEAR BELGRADE

German Drive in Serbia Meets Stubborn Resistance.

The Enemy Are Battering With Huge Artillery at the Advance Line of Serbian Defences, but Have Not Come Into Touch With Main Body of the Defenders—Belgrade Evacuated.

LONDON, Oct. 12.—The Austro-German armies which, with the help of their giant 305-millimetre guns, crossed the Danube and Save Rivers and occupied Belgrade, are meeting with stubborn resistance at the Serbian advance defences, but have not yet come in contact with the main Serbian forces. The German official report chronicles the fact that attacks are proceeding, but makes no claim of an advance. The announcement adds that the crossing of the Danube by the invading forces has been completed.

The Havas Agency correspondent at Nish reports that the combat on the Serbian front is very sanguinary, and that the losses on both sides are enormous, particularly in officers. The abandonment of the defence of Belgrade has given the enemy no advantage from a military standpoint, it is pointed out, as the garrison escaped to secured positions to the south.

Reports of preliminary engagements on the Serbian border have been received from Berlin and Nish. The latter, which was in the nature of a despatch to the Serbian Legation, says:

"On the northern frontier the enemy has crossed the Save at Yarak, at the Isle of Prograska, and at Zabrez, opposite Ostruznitsa, and the Danube, at the Great Island of Signallia, and at Ram.

"The advance guard which crossed at the Belgrade fortress has been partly captured and partly destroyed. At Yarak and the Isle of Prograska after several fierce attacks the enemy has been pinned to the very brink of the river with no losses to us. At the other crossing points the struggle continues.

"At Belgrade two officers and over 100 soldiers were captured, of whom eighteen were from the 204th Infantry Regiment of the 43rd German Division. Among the captured were also soldiers of a Prussian brigade belonging to the Fifteenth Army Corps, who came here from the Italian front."

Allied fleets already are reported off Bulgarian ports in the Aegean and Black Seas, and, in view of the possibility of a Russian landing on the Black Sea coast of Bulgaria, it is stated that a Turkish army is being sent there, so that the Bulgars will not be called upon to fight their old friends and protectors.

What assistance Italy will lend her allies in the new venture forced upon them in the Balkans is not disclosed, nor has any change in the policy of Roumania been announced.

The German press suggests that the Allies, despite the landing of troops in Saloniki, are preparing for more energetic operations against Turkey in the hope of smashing her before Germanic assistance arrives, and that Italy may take part in these operations. There still are three months of good weather ahead for any new move against the Dardanelles or for operations in other parts of the Aegean district, while the Rus-

BLACK, MIXED OR GREEN

DEFENDS PRESS BUREAU.

News is Censored at the Front by French's Men, Says Simon.

LONDON, Oct. 12.—Sir John A. Simon, the Home Secretary, last night issued a statement in which he defends the Official Press Bureau against the recent bitter attacks on its methods of censoring the news, and places a large measure of the responsibility for the trouble on the special censors at the front, who were appointed by Field Marshal Sir John French. It was they, he says, who excised from one of the despatches to the London Times a re-

SIR JOHN SIMON.

ference to the bravery shown by the German troops, which has occasioned such an outburst of indignation.

Sir John Simon declares it is a mistake to suppose that the Press Bureau exercises its own judgment concerning the class of news which should be withheld from publication. It examines the copy submitted to it, he says, "with a view to seeing whether what it is proposed to publish offends against any of the series of prohibitions which the War Office or Admiralty or other Government departments concerned think it is important to enforce."

ATTACKS HAVE CEASED.

German Activity Has Come to a Standstill in the East.

LONDON, Oct. 12.—The most significant point in the official reports of the fighting along the Russian front yesterday was contained in the

A TURK AND A TELEPHONE.

The Grand Vizier Looked on the New Scheme as an Evil One.

Long years ago, before the Young Turk party was born or thought of, the present writer was intrusted with negotiations for the issue of a "firman" (concession) permitting the installation of the public telephone in Constantinople, says a contributor to the London Chronicle. Said the then grand vizier, "This talking machine of which you speak, can it be placed anywhere?"

"Anywhere, highness." Then followed an exhaustive explanation of the conveniences of the system and the advantages certain to attend establishment of telephone communication between his highness' private residence and the imperial palace.

"I think I understand; correct me if I am wrong," said his highness. "It is night. I am fast asleep. Suddenly my slumbers are disturbed by the ringing of a bell within a few inches of my head. Is that so?"

"That is so, your highness." "I rouse myself. I take a part of the machine in my hand and hold it to my ear. I recognize a voice from Yildiz."

"Exactly, your highness." "Exactly. The voice tells me to proceed at once to the palace, as his majesty wishes to see me immediately."

"Your highness' grasp of the procedure is wonderful!"

"That would happen every night. I should never have a moment's sleep. I suffer quite enough from the palace as it is. Take the thing away. It is an invention of the evil one, and I will have nothing to do with it."

They have a telephone system now in Constantinople. But it took over twenty years to establish it, and it is more than probable that the view entertained by the average Turk with regard to its merit does not materially differ from that expressed by his highness, the grand vizier.

DEEP SEA LIFE.

Why It Cannot Exist Much Below the Four Mile Level.

In the American Magazine Cleveland Moffett describes the discoveries made by scientists who aboard the steamer Albatross fish all over the globe at a depth of three or four miles and bring up specimens for museums. Dr. Austin H. Clark of the Washington National museum, was the scientist in charge of this interesting vessel during

England to arrange for the exchange of raw materials.

NEW AERIAL ARMY.

France Has Assembled an Immense Fleet of Aeroplanes.

PARIS, Oct. 12.—An aerial army no longer a dream of romance. An army formed in divisions, squadrons, with battle aeroplanes, cruiser aeroplanes, scouts, torpedo planes, all armored and carrying three-inch cannon and rapid-fire guns, is a reality. It has been made possible through remarkable development of military aviation in France.

The French Government has just notified the first inspection of its fleet of aeroplanes. Opportunity given to inspect the large and all types of the new battle planes, to watch them as they were maneuvering high in the air, firing round from their three-inch guns, while they soared, looped, and tumbled about.

The Minister of War, Alexandre Millerand, assigned two military experts of the staff of the aviation service—Captain de Lafaruge and Lieutenant—to conduct the correspondence first to one point, the name of which may not be mentioned, where a new fleet of battle craft had been assembled, and later to the aviation school at B—, where 100 military aviators were learning to navigate the new war craft.

SO FAR 2,000,000.

Million More Are Wounded or Missing, Says U. S. Expert.

WEST POINT, Oct. 12.—Since the war in Europe started more than 2,000,000 men have been killed; wounded number nearly 4,000,000, while the total number of prisoners and of the missing is more than 10,000,000. These are conservative minimum figures compiled from the available data, and were made public in Cullum Hall here by Brigadier-General Francis Vinton Greene, U.S.A., retired, in an address to the war, delivered before the members of the New York State Historical Association.

General Greene is an honor graduate of West Point of the class of 1900, and the author of many standard works on military history. He is the hearer of the benefit of what he called an "intelligent guess" as to casualties of the war and submitted a table showing the increase of national indebtedness of the European belligerents. The increase in 1914 approximately is \$20,000,000,000.

Canadian Motors for Russia.

LONDON, Oct. 12.—General Booth has decided to transfer to the Russian Government five hospital motor-cars donated by Canada. These have been accepted in a special letter from the Czar, who is sending a messenger to receive them.

President and Fiancee.

WASHINGTON, Oct. 12.—President Wilson, accompanied by his fiancée, Mrs. Norman Galt, and members of his family, left for New York Friday, where the party was entertained by Colonel E. M. House, the President's close friend, Friday night at a private party, in honor of the announcement of the President's engagement. An unusually large crowd awaited the President's arrival at the Union station, where the party boarded the presidential car. Many women were the throng, eager to catch a glimpse of the engaged pair.

them in the Balkans is not disclosed, nor has any change in the policy of Roumania been announced.

The German press suggests that the Allies, despite the landing of troops in Saloniki, are preparing for more energetic operations against Turkey in the hope of smashing her before Germanic assistance arrives, and that Italy may take part in these operations. There still are three months of good weather ahead for any new move against the Dardanelles or for operations in other parts of the Aegean district, while the Russians under Grand Duke Nicholas are expected to force matters in the Caucasus and the British to push along to Bagdad.

BLEW UP CULVERT.

British Officer Performed Unparalleled Feat in Sea of Marmora.

LONDON, Oct. 12.—How Lieutenant O'Byrne Hughes, attached to a British submarine operating in the Sea of Marmora, swam from the craft, pushing ahead of him a raft bearing explosives with which he made a breach in the Turkish railway skirting the beach, is related in an official report given out in London. The statement, chronicling perhaps the strangest experience that has befallen any man during this war, says:

"His weapons consisted of an automatic service revolver and a sharpened bayonet. He also carried an electric torch and a whistle. The cliffs proved unscalable at the first point of landing. He, therefore, relaunched his raft till a less precipitous spot was reached, and after a swift climb and a considerable march he reached the railway."

Having blown up the bridge and summoned the submarine, the Lieutenant swam out to sea. However, on sighting the submarine, he mistook it for a group of Turkish rowboats, whereupon he swam towards shore and began to ascend the cliff in the hope of hiding. He then discovered his mistake and again entered the water. Subsequently he was rescued by the submarine when he was on the verge of exhaustion.

Sixth British M.P. Loses His Life.

NEW YORK, Oct. 12.—A cable to The Herald says: Lord Hillingdon has lost his eldest son and heir by the death of Second Lieutenant the Hon. Charles T. Mill, who was killed in action in France on Wednesday. Mr. Mill, who was in his twenty-ninth year, was a member of Parliament for Bridge, and the sixth member of Parliament to lose his life in the war.

New Zeppelin Destroyed.

PARIS, Oct. 12.—A letter from Brussels states that a new Zeppelin was destroyed in a night flight near the capital on September 7. The airship, while fighting a strong wind, crashed into a cottage and broke in two. Three ambulances removed the bodies of several members of the crew to Brussels.

\$100 Reward, \$100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case it fails to cure. Send for a list of testimonials.

of prohibitions which the War Office or Admiralty or other Government departments concerned think it is important to enforce."

ATTACKS HAVE CEASED.

German Activity Has Come to a Standstill in the East.

LONDON, Oct. 12.—The most significant point in the official reports of the fighting along the Russian front yesterday was contained in the statement from Berlin that Field Marshal von Hindenburg on the Dvinsk front had repulsed Russian attacks, which seemingly would indicate that for the first time since the German drive through Poland began the Austro-Germans are making no big offensive at any point along the whole eastern front.

A Bucharest despatch says that a force of about 150,000 Germans and Austrians is concentrated at Czernowitz, on the frontier of Bessarabia. The first line troops number about 60,000 and are supported by some 75,000 or 80,000 reserves.

The military critics here are inclined to regard the concentration of troops at Czernowitz as a silent but forceful hint to Roumania of what will happen if she draws her sword on the side of the Entente powers.

Now that the Russians are in a more stable position they are perfecting their equipment, and the receipt of an abundant supply of projectiles has enabled them to gradually assert their superiority over the exhausted Germans. It is now not uncommon for the Russian artillery fire to predominate in both volume and effect. Prisoners captured on the Vilna front admit the German troops are worn out by the unflagging obstinacy of the Russian resistance.

UNDER-SECRETARY BLAMED

Grey's Assistant is Half German and Wedded to German, Says Paper.

LONDON, Oct. 12.—Describing Great Britain's "diplomatic failure" in the Balkans as "ghastly," the Globe declares the foreign relations of the country cannot safely be left in the hands of the Foreign Office as it is at present constituted.

Its record, says the Globe, "has been one of dismal, tragic weakness. It is a misfortune that Sir Edward Grey speaks no language but his own. It is a greater misfortune that he has been incapacitated through ill-health. It is the greatest of all that his Permanent Under-Secretary, upon whom he must chiefly depend, is sprung from a German mother and married to a German woman."

"If the failure is not to culminate in disaster, the ill-omened partnership must be ended."

The Under-Secretary referred to apparently is Sir Eyre Crowe, K.C.M.G., whose mother was Asta, daughter of Baron G. von Barby, while his wife is Clema, widow of Eberhardt von Bonin, and daughter of the late Professor Gerhardt, of Berlin. Sir Eyre Crowe was appointed an Assistant Under-Secretary at the Foreign Office in 1912.

DEEP SEA LIFE.

Why It Cannot Exist Much Below the Four Mile Level.

In the American Magazine Cleveland Moffett describes the discoveries made by scientists who aboard the steamer Albatross fish all over the globe at a depth of three or four miles and bring up specimens for museums. Dr. Austin H. Clark of the Washington National museum, was the scientist in charge of this interesting vessel during one of her recent cruises in the Pacific. In the following extract taken from his article Mr. Moffett reports a conversation that he had with Dr. Clark:

"I inquired how far down in the ocean life is found, and the scientist replied that while soundings have been taken to a depth of six miles no traces of life have been found much below the four mile level, and oceanographers believe that at the bottom of the great ocean abyss, say at the five or six mile levels, no life exists or can exist."

"Because of the immense pressure?"

"No, because of the lack of food. You might think that food would sink to the bottom, since some of the deepest areas are near the shores, notably north of the West Indies, east of Japan, south of Newfoundland and, deepest of all, east of the island of Guam. Undoubtedly there is an abundant food supply on the surface of the ocean at these points, yet none of it in sinking will reach the bottom for the reason that whatever is not devoured on its way down by creatures of the sea will be dissolved in the lower levels, where the solubility of water is greatly increased, owing to the increased pressure. Not only is it believed that practically all animal and vegetable matter is dissolved at a depth of five or six miles, but the softer bones of animals are probably dissolved, leaving only the very hardest ones to reach the bottom. Thus the trawl nets bring up from great depth sharks' teeth and the ear bones of whales, which are extremely hard, but very rarely other bones."

Her Objection.

A little maid had a visitor, a girl of her own age, and after the two were put to bed at the usual hour it occurred to the small hostess that something to eat would be an agreeable novelty.

The mother demurred and the father emphatically objected. The discussion ended when a modest supply of food was carried to the bedroom.

The next night the little maid called her mother to the bedside.

"Stoop down, mamma," she said. Then she added, in a loud whisper, "I'm hungry, and I want something to eat, but I don't want it in the same spirit you showed last night."

She got it.—Cleveland Plain Dealer.

Heat Value of Woods.

Certain kinds of wood—hickory, oak, beech, birch, hard maple, ash, elm, locust, long leaf pine and cherry—have fairly high heat values, and only one cord of seasoned wood of these species is required to equal a ton of good coal. Hickory of the nonresinous woods has the highest fuel value per unit volume of wood and has other advantages. It burns evenly and, as housewives say, holds the heat. The oaks come next, followed by beech, birch and maple. Coastwise vessels in Florida pay twice as much for Florida buttonwood as for any other, because it burns with an even heat and with a minimum amount of smoke and ash.

The BLACK BOX

By E. PHILLIPS OPPENHEIM

SYNOPSIS.

Sanford Quest, master criminologist of the world, finds that in bringing to justice Macdougall, the murderer of Lord Ashleigh's daughter, he has but just begun a life-and-death struggle with a mysterious master criminal. In a hidden hut in Professor Ashleigh's garden he has seen an anthropoid ape skeleton and a living inhuman creature, half monkey, half man, destroyed by fire. In his room have appeared from nowhere black boxes, one containing diamonds torn from a lovely throat by a pair of armless, threatening hands, both with sarcastic, threatening notes signed by the inscrutable hands. He is arrested for the murder of his valet, Ross Brown, and a Miss Quigg, in his rooms. Laura and Lenora, his assistants, suspect Craig, the professor's valet. Lenora is abducted by the threatening hands, but is rescued. Quest clears himself of the murder charge, but fails to trap Craig. In his rooms another black box appears in the rifled safe and, returning the diamonds a second time, the accompanying note tells him he has no chance against the inherited cunning of ages.

SEVENTH INSTALLMENT

THE HOUSE OF MYSTERY.

CHAPTER XVI.

Something in the nature of a conference was proceeding in Quest's study. The professor was there, seated in the most comfortable easy-chair, smoking without relish one of his host's best cigars, watching with nervous impatience the closed door. Laura and Lenora were seated at the table, dressed for the street. They had the air of being prepared for some excursion. Quest, realizing the professor's highly strung state, had left him alone for a few moments and was studying a map of New York. The latter, however, was too ill at ease to keep silent for long.

"Our friend French," he remarked, "gave you no clue, I suppose, as to the direction in which his investigations are leading him?"

Quest glanced up from the map.

"None at all. I know, however, that the house in which Lenora here was confined is being watched closely."

The professor glanced across toward the table before which Lenora was seated.

"It seems strange," he continued, "that the young lady should have so little to tell us about her incarceration."

Lenora shivered for a moment.

"What could there be to tell," she asked, "except that it was all horrible, and that I felt things—felt dangers—which I couldn't describe."

The professor gave vent to an impatient little exclamation.

"I am not speaking for fancies," he persisted. "You had food brought to you, for instance. Could you never see the hand which placed it inside your room? Could you hear nothing of the footsteps of the person who brought it? Could you not even surmise whether it were a man or a

to: A man of medium height, rather thin, pale, and after running a short distance he put his hand to his heart, as though out of breath. One of the boys thought his nose was a little hooked, and they both remarked upon the fact that although he shouted after them, he used no swear words, but simply tried to induce them to stop. This description suggest anything to you, gentlemen?"

"Craig," Lenora said firmly.

"It is a very accurate description of Craig," Sanford Quest agreed.

The professor looked troubled, also a little perplexed. He said nothing, however.

"Under these circumstances," the inspector continued, "I have had the house watched, and I propose that we now search it systematically. It is very possible that something may transpire to help us. Of course, my men went through it roughly when we brought Miss Lenora away, but that wasn't anything of a search to count, if the place really has become a haunt of criminals."

"What about the ownership of the house?" Quest asked, as he took up his hat.

The inspector nodded approvingly.

"I am making a few inquiries in that direction," he announced. "I expect to have something to report very shortly."

The professor stood drawing on his gloves. The vague look of trouble still lingered in his face.

"Tell me again," he begged, "the name of the avenue in which this residence is situated?"

"Gayson avenue," the inspector replied. "It's a bit out of the way, but it's not a bad neighborhood."

The professor repeated the address to himself softly. For a moment he stood quite still. His manner showed signs of growing anxiety. He seemed to be trying to remember something.

"The name," he admitted finally, as they moved towards the door, "suggests to me, I must confess—we are going to see the house inspector?"

"We are on our way there now, sir—that is if the young ladies are willing?" he added, glancing at Laura.

"We've been waiting here with our hats on for the last half hour," Laura

had escaped me," the professor continued sorrowfully. "I remember that it was on the anniversary of his having been with me for some fifteen years that I decided to show him some substantial mark of my appreciation. I knew that he was looking for a domicile for his father and mother, who are since both dead, and I requested a house agent to send me in a list of suitable residences. This, alas! was the one I purchased."

Quest glanced around the place. "I think," he said, "that the professor's statement now removes any doubt as to Craig's guilt. You are sure the house has been closely watched, inspector?"

"Since I received certain information," French replied, "I have had half a dozen of my best men in the vicinity. I can assure you that no one has entered or left it during the last twenty-four hours."

They made their way to the piazza steps and entered by the front door. The house was an ordinary framework one of moderate size, in poor repair, and showing signs of great neglect. The rooms were barely furnished and their first cursory search revealed no traces of habitation. There was still the broken skylight in the room which Lenora had occupied, and the bed upon which she had slept was still crumpled. French, who had been tapping the walls downstairs, called to them. They trooped down into the hall. The inspector was standing before what appeared to be an ordinary panel.

"Look here," he said, glancing out of the corner of his eye to be sure that Laura was there, "let me show you what I have just discovered."

He felt with his thumb for a spring. In a moment or two a portion of the wall, about two feet in extent, slowly revolved, disclosing a small cupboard fitted with a telephone instrument.

"A telephone," the inspector remarked, pointing to it, "in an unoccupied house and a concealed cupboard. What do you think of that?"

The professor shook his head.

"Don't ask me," he groaned.

French took the receiver from its rest and called up the exchange.

"Inspector French speaking," he announced. "Kindly tell me what is the number of the telephone from which I am speaking, and who is the subscriber?"

He listened to the reply and asked another question.

"Can you tell me when this instrument was last used? . . . When?"

"Thank you!"

The inspector hung up the receiver. "The subscriber's name," he told them dryly, "is Brown. The number is not entered in the book, by request. The telephone was used an hour ago from a call office and connection was established. That is to say, that someone spoke from this telephone."

"Then if your men have maintained their search properly, that someone," Quest said slowly, "must be in the house at the present moment."

"Without a doubt," the inspector agreed.

"I am going to search the front room on the first floor before we do anything else," said Quest. "I think that if you wait here I may be able to show you something directly."

Quest ascended the stairs and entered a wholly unfurnished room on the left-hand side. He looked for a

He Was Wea

a door. Quest rushed for it and sto guard. A moment later, however, called to Laura and pressed his volve into her hand.

"Stand there," he ordered. "Sho him if he tries to run out. I'll sear in the packing cases. He might dangerous."

The professor, out of breath, w leaning against one of the pilla his arm passed around it for suppo Lenora, with Quest and Fren searched hastily amongst the packi cases. Suddenly there was a lo crack, the sound of falling mason followed by a scream from Lau French, with a roar of anger, rush toward her. She was lying on t side, already half covered by falli bricks and masonry. He dragged h away, just in time.

"My God, she's fainted!" he claimed.

"I haven't," Laura faltered, tryi to open her eyes, "and I'm not goi to, but I think my arm's broken, a my side hurts."

"The fellow's not down here, a way," Quest declared. "Let's helpl upstairs and get her out of tl devil's house."

They supported her up the sta and found a chair for her in the h

The inspector swung open the te phone cupboard and called for an a balance. Then Quest, who had b examining the staircase, sudden gave a little exclamation.

"He's done us!" he cried. "Lo here, French, this is the original sta case. There's the leather loop. know it because there was a crack the fourth stair. When we rush down the cellar after him, he swu the thing round again and siml walked out of the front door. Dar it, man, it's open!"

They hurried outside. French bl his whistle. One of the plain-cloth men came running up from the a nue. He was looking a little shee ish.

"What's wrong?" French dema ed.

"He's gone off," was the unwilll reply. "I guess that chap's given the slip."

"Speak up," French insisted.

"The only place," the man went ("we hadn't our eyes glued on w the front door. He must have cor out through that. There's been motortruck with one or two ene

"What could there be to tell," she asked, "except that it was all horrible, and that I felt things—felt dangers—which I couldn't describe."

The professor gave vent to an impatient little exclamation.

"I am not speaking for fancies," he persisted. "You had food brought to you, for instance. Could you never see the hand which placed it inside your room? Could you hear nothing of the footsteps of the person who brought it? Could you not even surmise whether it were a man or a woman?"

Lenora answered him with an evident effort. She had barely, as yet, recovered from the shock of those awful hours.

"The person who brought me the food," she said, "came at night—never in the daytime. I never heard anything. The most I ever saw was once—I happened to be looking toward the door and I saw a pair of hands—nothing more—setting down a tray. I shrieked and called out. I think that I almost fainted. When I found courage enough to look, there was nothing there but the tray upon the floor."

The professor sighed as he turned away.

"It is evident, I am afraid," he said, "that Miss Lenora's evidence will help no one. As an expert in these affairs, Mr. Quest, does it not seem to you that her imprisonment was just a little purposeless? There seems to have been no attempt to harm her in any way."

"Whoever took the risk of abducting her," Quest pointed out grimly, "did it for a purpose. That purpose would probably have been developed in course of time. However we look at it, Mr. Ashleigh, there was only one man who must have been anxious to get her out of the way, and that man was Craig. Here comes our friend French. I have an idea that he has something to tell us."

They glanced expectantly towards the door as French entered. The inspector, who was looking very spruce and well brushed, wished them a general good-morning. His eyes rested last and longest upon Laura, who seemed, however, unconscious of his presence.

"Now, then, French," Quest began, as he returned his greeting, "take a cigar, make yourself comfortable in that chair and let us have your news. As you see, we have obeyed orders. We are all ready to follow you anywhere."

"It won't be to the end of the world, anyway," the inspector remarked, as he lit his cigar. "I am going to propose a little excursion down Gayson avenue way."

"Back to that house?" Lenora exclaimed with a grimace.

The inspector nodded.

"We have had those boys at the station," he went on, "and we have questioned them carefully. It seems that after they had picked up the ball, a man came out of the side entrance of the house, saw them reading Miss Lenora's message, and shouted after them. The boys had sense enough to scoot. The man ran after them, but had to give it up. Here is their description of him."

The inspector took a piece of paper from his pocket. They all waited breathlessly.

"Had to drag this out of the boys, bit by bit," the inspector proceeded, "but boiled down and put into reasonable language, this is what it comes

The Whole Staircase Suddenly Began to Revolve.

replied promptly. "You've stretched your ten minutes out some, Mr. French."

The inspector maneuvered to let the others pass on, and descended the stairs by Laura's side.

"Couldn't help it," he confided, lowering his tone a little. "Had some information in about that house I couldn't quite size up. You're looking well this morning, Miss Laura."

"Say, who are you guying!" she replied.

"I mean it," the inspector persisted. "That hat seems to suit you."

Laura laughed at the top of her voice.

"Say, kid," she exclaimed to Lenora, "the inspector here's setting up as a judge of millinery!"

Lenora turned and looked at them both with an air of blank astonishment. The inspector was a little embarrassed.

"No need to give me away like that," he muttered, as they reached the hall. "Now then, ladies and gentlemen, if you are ready."

They took their places in the automobile and drove off. As they neared the vicinity of Gayson avenue the professor began to show signs of renewed uneasiness. When they drew up at last outside the house he gave a little exclamation. His face was grave, almost haggard.

"Mr. Quest," he said, "Inspector French, I deeply regret that I have a statement to make."

They both turned quickly toward him. The inspector smiled in a confidential manner at Laura. It was obvious that he knew what was coming.

"Some years ago," the professor continued, "I bought this house and made a present of it to—"

"To whom?" Quest asked quickly.

"To my servant Craig," the professor admitted with a groan.

Lenora gave a little cry. She turned triumphantly towards the inspector.

"All recollection as to its locality.

telephone."

"Then if your men have maintained their search properly, that someone," Quest said slowly, "must be in the house at the present moment."

"Without a doubt," the inspector agreed.

"I am going to search the front room on the first floor before we do anything else," said Quest. "I think that if you wait here I may be able to show you something directly."

Quest ascended the stairs and entered a wholly unfurnished room on the left-hand side. He looked for a minute contemplatively at a large but rather shallow cupboard, the door of which stood open, and tapped lightly with his forefinger upon the back part of it. Then he withdrew a few feet and, drawing out his revolver, deliberately fired into the floor, a few inches inside. There was a half-stifled cry. The false back suddenly swung open and a man rushed out. Quest's revolver covered him, but there was no necessity for its use. Craig, smothered with dust, his face white as a piece of marble, even his jaw shaking with fear, was wholly unarmed. He seemed, in fact, incapable of any form of resistance.

"Walk out of the room," Quest ordered, "in front of me—so! Now turn to the right and go down the stairs."

They all gave a little cry as they saw him appear, a trembling, pitiful creature, glancing around like a trapped animal. He commenced to descend the stairs, holding tightly to the banisters. Quest remained on the landing above, his revolver in his

hand. French waited in the hall below, also armed. Laura gripped Lenora's arm in excitement.

"They've got him now!" she exclaimed. "Got him, sure!"

On the fourth or fifth stair Craig hesitated. He suddenly saw the professor standing below. He gripped the banisters with one hand. The other he flung out in a threatening gesture.

"You've given me away to these bloodhounds!" he cried—"you, for whom I have toiled and slaved, whom I have followed all over the world, whom I have served faithfully with the last breath of my body and the last drop of blood in my veins! You have brought them here—tracked me down! You!"

The professor shook his head sorrowfully.

"Craig," he said, "you have been the best servant man ever had. If you are innocent of these crimes you can clear yourself. If you are guilty a dog's death is none too good for you."

Craig seemed to sway for a moment upon his feet. Only Lenora, from the hall, saw that he was fitting his right foot into what seemed to be a leather loop hanging from the banisters. Then a wild shout of surprise broke from the lips of all of them, followed by a moment of stupefied wonder. The whole staircase suddenly began to revolve. Craig, clinging to the banisters, disappeared. In a moment or two there was a fresh click. Another set of stairs, identical to the first, had taken their place.

"The cellar!" Quest shouted, as he rushed down the stairs. "Quick!"

They wrenched open the wooden door and hurried down the dark steps into the gloomy, unlit cellar. The place was crowded with packing cases and two large wine barrels stood in the corner. At the farther end was

his whistle. One of the plain-clothed men came running up from the avenue. He was looking a little sheepish.

"What's wrong?" French demanded.

"He's gone off," was the unwilling reply. "I guess that chap's given the slip."

"Speak up," French insisted.

"The only place," the man went on, "we hadn't our eyes glued on was the front door. He must have come out through that. There's been a motortruck with one or two queer-looking chaps in it at the corner of the avenue there for the last ten minutes. I'd just made up my mind to stroll round and see what it was to when Jim, who was on the other side, shouted out. A man jumped into it and they made off at once."

The inspector's rubicund countenance was white with fury. His head kept turning in the direction of Laura to whom the professor was busy rendering first aid.

"If I never take another job on as long as I live," he declared, "I'll have that fellow before I'm through!"

CHAPTER XVII.

The professor roused himself from what had apparently been a very gloomy reverie.

"Well," he announced, "I must go home. It has been very kind of you, Mr. Quest, to keep me here for so long."

Quest glanced at the clock.

"Don't hurry, Mr. Ashleigh," he said. "We may get some news at any moment. French has a dozen men out on the search and he has promised to ring me up immediately I hears anything."

The professor sighed.

"A man," he declared, "who for twenty years can deceive his master as utterly and completely as Craig has done me, who is capable of such diabolical outrages, and who, when capture stares him in the face, is capable of an escape such as he made today, is outside the laws of probability. Personally, I do not believe that I shall ever again see the face of my servant, any more than that you, Quest, will entirely solve the mystery of these murders and the theft of the Rheinholdt jewels. What can we do against men who have revolving staircases and trolley-load of river pirates waiting for them? You may be a scientific criminologist, Quest, but that fellow Craig is a scientific criminal, if ever there was one."

Quest crossed the room towards his cigar cabinet, and opened it. His little start was apparent to both of them. Lenora laid down the bag which she had just lifted up. The professor leaned forward in his chair.

"What is it, Quest?" he demanded.

Quest stretched out his hand and picked up from the top of the cigar a small black box! He laid it on the table.

"Unless I am very much mistaken," he said, "it is another communication from our mysterious friend."

"Impossible!" the professor exclaimed hoarsely.

"How can he have been here?" Lenora cried.

Quest removed the lid from the box and drew out a circular card. Around the outside edge was a very clever pen and ink sketch of a life buoy, and inside the margin were several sentences of clear handwriting

He Was Wearing Craig's Clothes.

a door. Quest rushed for it and stood guard. A moment later, however, he called to Laura and pressed his revolver into her hand.

"Stand there," he ordered. "Shoot him if he tries to run out. I'll search in the packing cases. He might be dangerous."

The professor, out of breath, was leaning against one of the pillars, his arm passed around it for support. Lenora, with Quest and French, searched hastily amongst the packing cases. Suddenly there was a loud crack, the sound of falling masonry, followed by a scream from Laura. French, with a roar of anger, rushed toward her. She was lying on her side, already half covered by falling bricks and masonry. He dragged her away, just in time.

"My God, she's fainted!" he exclaimed.

"I haven't," Laura faltered, trying to open her eyes, "and I'm not going to, but I think my arm's broken, and my side hurts."

"The fellow's not down here, anyway," Quest declared. "Let's help her upstairs and get her out of this devil's house."

They supported her up the steps and found a chair for her in the hall.

The inspector swung open the telephone cupboard and called for an ambulance. Then Quest, who had been examining the staircase, suddenly gave a little exclamation.

"He's done us!" he cried. "Look here, French, this is the original staircase. There's the leather loop. I know it because there was a crack on the fourth stair. When we rushed down the cellar after him, he swung the thing round again and simply walked out of the front door. Damn it, man, it's open!"

They hurried outside. French blew his whistle. One of the plain-clothes men came running up from the avenue. He was looking a little sheepish.

"What's wrong?" French demanded.

"He's gone off," was the unwilling reply. "I guess that chap's given us the slip."

"Speak up," French insisted.

"The only place," the man went on, "we hadn't our eyes glued on was the front door. He must have come out through that. There's been a motortruck with one or two queer-

ing. In the middle was the signature—the clenched hands! Quest read the message aloud:

In the great scheme of things, the Supreme Ruler of the universe divided an inheritance amongst his children. To one he gave power, to another strength, to another beauty, but to his favorite he gave cunning. They all looked at one another.

"What does it mean?" Lenora gasped.

"A lifebuoy!" the professor murmured.

They both stared at Quest, who remained silent, chewing hard at the end of his cigar.

"Every message," he said, speaking half to himself, "has had some significance. What does this mean—a lifebuoy?"

He was silent for a moment. Then he turned suddenly to the professor.

"What did you call those men in the motortruck, professor—river pirates? And a lifebuoy! Wait."

He crossed the room towards his desk and returned with a list in his hand. He ran his finger down it, stopped and glanced at the date.

"The Durham," he muttered, "cargo cotton, destination Southampton, sails at high tide on the 16th. Lenora, is that calendar right?"

"It's the 16th, Mr. Quest," she answered.

Quest crossed the room to the telephone.

"I want number one, central," he said. "Thank you! Put me through to Mr. French's office. . . . Hello, French! I've got an idea. Can you come round here at once and bring an automobile? I want to get down to the docks—not where the passenger steamers start from—lower down. . . . Good! We'll wait."

Quest hung up the receiver.

"See here, professor," he continued, "that fellow wouldn't dare to send this message if he weren't pretty sure of getting off. He's made all his plans beforehand, but it's my belief we shall just get our hands upon him, after all."

Presently he heard the automobile stop outside and French appeared.

"Anything doing?" he asked.

Quest showed him the card and the sailing list.

The inspector glanced at the clock.

"Then we've got to make tracks," he declared, "and make them quick."

Quest Stood on Guard.

unnaturally large, loomed up the great bows of an ocean-going steamer. The tug was swung round and then ran up alongside. The man with the beard leaned over.

"Say, what's your trouble?" he demanded.

The inspector stepped forward.

"I want that man you've got under the tarpaulin," he announced.

"Say, you ain't the river police?"

"I'm Inspector French from headquarters," was the curt reply. "The sooner you hand him over, the better for you."

"Do you hear that, O'Toole?" the other remarked, turning around. "Get up, you blackguard!"

A man rose from underneath the dishkin. He was wearing Craig's clothes, but his face was the face of a stranger. As quick as lightning Quest swung round in his place.

"He's fooled us again!" he exclaimed. "Head her round, captain—back to the Durham!"

The sailor shook his head.

"We've lost our chance, guv'nor," he pointed out. "Look!"

Quest set his teeth and gripped the inspector's arm. The place where the Durham had been anchored was empty. Already, half a mile down the river, with a trail of light behind and her siren shrieking, the Durham was striding out seawards.

WOMAN SUFFERED TEN YEARS

From Female Ills—Restored to Health by Lydia E. Pinkham's Vegetable Compound.

Belleville, N.S., Canada.—"I doctored for ten years for female troubles and did not get well. I read in the paper about Lydia E. Pinkham's Vegetable Compound and decided to try it. I write now to tell you that I am cured. You can publish my letter as a testimonial."—Mrs. SUVRINE BABINE, Belleville, Nova Scotia, Canada.

Another Woman Recovers.

Auburn, N. Y.—"I suffered from nervousness for ten years, and had such organic pains that sometimes I would lie in bed four days at a time, could not eat or sleep and did not want anyone to talk to me or bother me at all. Sometimes I would suffer for seven hours at a time. Different doctors did the best they could for me until four months ago I began giving Lydia E. Pinkham's Vegetable Compound a trial and now I am in good health."—Mrs. WILLIAM H. GILL, No. 15 Pleasant Street, Auburn, New York.

The above are only two of the thousands of grateful letters which are constantly being received by the Pinkham Medicine Company of Lynn, Mass., which show clearly what great things Lydia E. Pinkham's Vegetable Compound does for those who suffer from woman's ills.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

TECHNIC OF PAINTING.

Modern Color Methods and Those of the Old Masters.

Many persons think that the paintings by the old masters owe their permanency in some degree to secret processes now lost. In the Journal of the Franklin Institute Dr. Maximilian Toch points out that as a matter of fact the old masters used only those few colors (madder, for example) the permanency of which was well established, and that they avoided mixing colors known to have a bad chemical effect on one another.

Incidentally he describes the scientific methods of detecting later day copies. Zinc white, where flake white would have been used, protoplasmic remains in the cells of the wood used for the picture and the transparency of the bitumen in the shadows are proofs that a picture is not a genuine antique. In respect to deterioration the author mentions the bad effects of smoke and modern gas fumes and, after saying that either light or darkness may bleach a picture, points out that some pictures that have been kept in the dark can be restored by placing them in bright sunlight.

Finally Dr. Toch condemns those modern painters who substitute the collapsible tube or palette knife for the

ten came running up from the avenue. He was looking a little sheepish. "What's wrong?" French demanded. "He's gone off," was the unwilling reply. "I guess that chap's given us the slip." "Speak up," French insisted. "The only place," the man went on, "we hadn't our eyes glued on was the front door. He must have come out through that. There's been a motortruck with one or two queer-looking chaps in it at the corner of the avenue there for the last ten minutes. I'd just made up my mind to troll round and see what it was up to when Jim, who was on the other side, shouted out. A man jumped up into it and they made off at once." The inspector's rubicund countenance was white with fury. His head kept turning in the direction of Laura, whom the professor was busy rendering first aid. "If I never take another job on as long as I live," he declared, "I'll have that fellow before I'm through!"

Presently the heard the automobile stop outside and French appeared. "Anything doing?" he asked. Quest showed him the card and the sailing list. The inspector glanced at the clock. "Then we've got to make tracks," he declared, "and pretty quick, too. She'll be starting from somewhere about number twenty-eight dock, a long way down. Come along, gentlemen." They hurried out to the automobile and started off for the docks. The latter part of their journey was accomplished under difficulties, for the street was packed with drays and heavy vehicles. They reached dock number twenty-eight at last, however, and hurried through the shed on to the wharf. There were no signs of a steamer there. "Where's the Durham?" Quest asked one of the carters, who was just getting his team together. The man pointed out to the middle of the river, where a small steamer was lying. "There she is," he replied. "She'll be off in a few minutes. You'll hear the sirens directly when they begin to move down." Quest led the way quickly to the edge of the wharf. There was a small tug there, the crew of which were just making her fast for the night. "Fifty dollars if you'll take us out to the Durham and catch her before she sails," Quest shouted to the man who seemed to be the captain. They clambered down the iron ladder and jumped on to the deck of the tug. The captain seized the wheel. The two men who formed the crew took off their coats and waistcoats. "Give it to her, Jim," the former ordered. "Now then, here goes! We'll just miss the ferry." They swung around and commenced their journey. Quest stood with his watch in his hand. They were getting up the anchor of the Durham and from higher up the river came the screen of steamers beginning to move on their outward way. "We'll make it all right," the captain assured them. They were within a hundred yards of the Durham when Quest gave a little exclamation. From the other side of the steamer another tug shot out away, turning back towards New York. Huddled up in the stern, half concealed in a tarpaulin, was a man in a plain black suit. Quest, with a little shout, recognized the man at the helm from his long, brown beard. "That's one of those fellows who was in the truck," he declared, "and that's Craig in the stern! We've got him this time. Say, captain, it's that tug I want. Never mind about the steamer. Catch it and I'll make it a hundred dollars!" "We've got her!" he captain exclaimed. There's the ferry and the first of the steamers coming down in the middle. They'll have to chuck it." Right ahead of them, blazing with lights, a huge ferry came churning the river up and sending waves in their direction. On the other side,

SEE THE PICTURES AT WONDERLAND

Prohibited Coffee Houses.

So many coffee houses sprang into existence in England during the reign of Charles II. that he, entertaining a belief that many political intrigues had their beginning in those places, issued an edict ordering them to be closed. In this proclamation the following words occurred: "The retailing of coffee or tea might be an innocent trade, but it was said to nourish sedition, spread lies and scandalize great men. It might also be a common nuisance" — Exchange.

Amending a Proverb.

There are a lot of silly proverbs knocking about. Take, for instance, "If pigs had wings they would fly." Now, this is absurd if you like. Do you know what sized wings a pig weighing eighty pounds would require in order to fly? They would measure about thirty yards from tip to tip. A nice state of things to keep pigs in an aviary with wings of that size! The proverb would run much better:

If pigs could fly
Pork would be high.

—London Scraps.

Slept at Will.

It must be essential to every general and indeed to every man who is bearing a heavy load of anxious business to be a good sleeper. Napoleon was a first rate sleeper; so was Pitt; so was Brougham; so was Mr. Gladstone; so was Wellington. At Salamanca Wellington, having given his order for the battle, said to his aid-de-camp: "Watch the French through your glass, Fitz Roy. I am going to take a rest. When they reach that copse near the gap in the hills wake me." Then he lay down and was fast asleep in a minute. In the midst of the critical operations before Waterloo, feeling weary, he laid himself down, put a newspaper over his face and took a nap.

Artificial Skies.

Sky and air are the hardest things to imitate on the stage, but this old problem has been solved. Clear sky, cloudy sky and distance effects are obtained by shooting light on a very carefully built concrete dome. The smooth white surface of the concrete reflects the light rays in so many directions that they all blend. At the same time the light thrown on the dome is carefully filtered to obtain just the right color.

The combined result can be made to give the impression that the roof over the stage has been taken off to let the sky in. Then, with a moving picture machine in the wings, cloud effects may be added without difficulty. — Saturday Evening Post.

CASTORIA

the picture and the transparency of the bitumen in the shadows are proofs that a picture is not a genuine antique. In respect to deterioration the author mentions the bad effects of smoke and modern gas fumes and, after saying that either light or darkness may bleach a picture, points out that some pictures that have been kept in the dark can be restored by placing them in bright sunlight. Finally Dr. Toch condemns those modern painters who substitute the collapsible tube or palette knife for the brush on the ground that the flakes of color thus attached to the canvas will crack off and become detached. If that method had been used by the ancients no trace of their work would now exist.

The Heroines of Novels.

If I were his Satanic majesty and a novelist came to me for judgment I should beetle my brows in a horrible manner and quiz him thus: "Did you ever make your heroine eighteen years old? Did you ever endow a maiden with the repartee of Pinero, the intuition of Blavatsky, the carriage of Garden, the hauteur of the Medici, the beauty of Aphrodite and the wisdom of Athena—all at the age of eighteen years?" If the novelist answered me "Certainly not!" I should say, "To heaven with you!" But if he answered, "Sure, I did!" I would blast him where he stood.

For of all the iniquitous, fallacious, unfair and dangerous doctrines this takes the icing off the cake—that the female species reaches her apogee at the immature age of eighteen.—George Weston in Saturday Evening Post.

Types of Feet.

Among the various races of men, three types of feet occur. Certain pure races have one type of toe which is characteristic of each race. Thus, the Zulus, the Basques and probably most pure Celts have the even toed foot, while the Papuans, the Boschmen and a number of African tribes, as well as both ancient and modern Egyptians have the arch toed foot. Many European nations, however, have a mixture of the three types. But it is certain that among the English, and probably among the Germans, French and Greeks, the even toed foot is the commonest.—Strand Magazine.

Reward of Writers.

Writers of nonfiction today seldom fare more handsomely than did Chief Justice John Marshall, who, 110 years ago, received \$60,000 for his life of Washington. After Stevenson's death the royalties on his books amounted every year to ten times the sum he had received a few years before.

The Swordfish.

So powerful is the jaw of the swordfish, from which the sword projects, that it has been known, in attacking vessels, to pierce through oak timbers to the depth of ten inches.

The Cossacks.

No matter how old a Cossack is he belongs to the reserve forces of the "national defense" in Russia and, if required, accompanies his sons and grandsons to battle.

MINUTES OF RICHMOND COUNCIL.

October 4th, 1915.

The council met at Selby:—

The members present were:—Messrs. Carleton Woods, Reeve; Councilors, Christie Kellar, R. Z. Bush, E. R. Sills, and Walter Russell.

The Reeve presided.

The minutes of the last meeting were read and confirmed.

Moved by R. Z. Bush, seconded by C. Kellar that Dafee & Waller receive an order for \$32.50, for material furnished Township. Carried.

Moved by C. Kellar, seconded by R. Z. Bush, that an order be given to Frank R. Perry for \$9.93, for work done on Vader's Bridge. Carried.

Moved by E. R. Sills, seconded by R. Z. Bush, that this council grant \$25 to road division No. 9, to be expended by the pathmaster. Carried.

A By-law striking the rate for 1915 was introduced and read a first time. The council went into a committee of the whole on the second reading of the By-law, striking the rate as follows:—For county purposes including general county rate, war tax, and schools 7½ mills on the dollar municipal rate for municipal purposes 2½ mills on the dollar, the general school rate 5½ mills on the dollar.

The By-law on motion was read the second time. The By-law on motion was read the third time and signed by the Reeve and Clerk and finally passed. Carried.

Moved by E. R. Sills, seconded by W. Russell, that the following persons be paid 10c. per rod for building wire fences along the roads in Richmond, according to By-Law. Levi Sagar for 60 rods fence, \$6; Mrs. J. H. Miles for 51 rods fence, \$5.10. Carried.

Moved by W. Russell, seconded by E. R. Sills, that the following accounts be paid:—Mrs. M. Carscallen for 5 loads of gravel furnished road division No. 63, by order of pathmaster, 50c; H. L. Shannon for 90 loads gravel furnished road divisions No. 5 and 6, by order of pathmaster, \$9; Day & Son for tile furnished Township \$6; Hiram Stafford, grant on road division No. 6, \$10; Horace Paul, grant on road division No. 34, \$25; for legal advice, \$1. Carried.

Moved and seconded that this council adjourn to meet on the first Monday in November at the hour of 10 o'clock a.m. Carried.

A NEW ISSUE

W. M. S. CONVENTION

NAPANEE DISTRICT—TAMWORTH
DIVISION.The 9th Annual Convention of Nap-
anee District, (Tamworth Division,)
convened in the Methodist Church at
Moscow, on Wednesday October 6th,
1915; with the District Organizer,
Mrs. John Wartman presiding.An unusually large gathering of re-
presentatives women attended both
morning and afternoon sessions.The program, which had been care-
fully and thoughtfully planned proved
a real treat, and the interest was
well sustained throughout.The morning session was opened
with devotional exercises, conducted
by Rev. W. A. Bunner, pastor of the
convention church.Mrs. E. J. Wagar was appointed
Sec. Treas. for the District, also press
reporter.Very interesting and encouraging
were the reports read in response to
the Roll Call. The pointed and well-
arranged schedules were an innova-
tion especially welcomed by the Cor-
responding Secretaries and the Dis-
trict Sec'y.

The reports were as follows:

	Annual Members	Life Members	Raised Since May
12 Auxiliaries...	289	32	\$225 84
3 Circles	72	21	17 96
7 Bands	245	25	16 08
Total membership	606	78	\$259 88

The fact that two of the largest
Bands did not report the amount of
receipts since May, and that there are
a large number of Mite Boxes still
unopened, would materially change
the amount raised in the District.There are 102 Outlooks, 37 Annual
Reports, 113 Palm Branches, and 20
Monthly Letters taken in the District.The Books of study used in the var-
ious Auxiliaries and Circles are "The
Child in the midst" and "The King's
Highway," while the Bands are tak-
ing up "Japan for Juniors," "Up
down the Pacific," and "Around the
World with Jack and Janet."The "Suggested Program" is also
in general use in nearly all the Aux-
iliaries.Some very helpful plans and ideas
were given for future work re-raising
funds and increasing membership.
The sale of old newspapers brought a
goodly sum to one Band last year,
and is being worked again this year.
Candy making, Quiltmaking, sewing
circles, selling cake recipes are all on
the list.Some Bands and Auxiliaries special-
ize on Mite Boxes, some on Birthday
gifts and some on Life Members.
"Copper folders" were mentioned by
only one Auxiliary. Others have
found high class Musical Cantatas
and Recitals a good source of income.A "Crusade Day" and "Contests"
were plans for increasing membership
in all three societies. A personal in-
vitation to every woman, girl and
child in the Methodist Church was
urged.Four Auxiliaries report Systematic
Giving, and four also give regularly
to the Rest Fund.One Auxiliary is organizing a Study
Class, using the new Book, "The
King's Highway," and holding open
or public meetings as a means of
increasing interest in Missionary

ized inhabitants are engaged in war.
Whole centuries of human history are
being focused into months, by the
tremendous tragedy that has com-
upon us. As millions see it, it is
struggle for humanity, a struggle for
human liberty, Right against Might,
Peace against War. It is not mere
a war between Germany, Austria and
Turkey as against the Allies, but be-
tween civilization, with the right to
free and peaceful development for big
and small nations on the one
hand, and an intolerant military ar-
bitration for World Power, on the other.

Taking this view, what wonder that
we are highly resolved to carry to
struggle to the bitter end.

It is true that it is a tragic hour
in the world's history; it is true that
to-day is making demands on men
that no other day has ever made,
but it is not also true that it is the
day of opportunity, a day that
begins with hope? The answer lies
with the Christian Church. This
not a war of Brute force merely,
is the contending of great spiritual
principles and ideals, in the interest
of human Progress and Uplift.

The one source of comfort we have
that we as a nation are at war,
the Justice of our Cause. If the lead-
ers of our nation had cowardly shirked
their responsibility, and the British
Empire and Union Jack ceased
stand for Liberty, for Justice, for
help for the weak and oppressed,
I would have hung our heads in shame
for a nation that regards not honor
any way have avoided the war? This
is doomed. Could Great Britain
words of our Gracious Majesty King
George were "Had I stood aside,
should have sacrificed my honor, and
given to destruction the Liberty
of my Empire and of Mankind."

The question of the German Cham-
bellor to the British Ambassador
"Will you go to war just for a scrap
of Paper," was answered by Britain
"Yes! for a scrap of Paper, we will
fight."

Till our last breath, and God
send the Right.

By God, by faith, by honor, Yes
we fight,

To keep our names upon that Paper
—White.

When this war first broke out, the
thing most desired by all was Peace.
Sir Edward Grey never ceased to work
for Peace. He proposed a confer-
ence of Ambassadors in London, and
even went so far as to promise Ger-
man an undertaking to safe guard it
from any aggressive policy of France,
Russia and England in the future.
No greater offer was possible. Then
Britain is clear. The responsibility
lies not at her door, and terrible
this war is, it would have been won
had Britain stood by and seen cru-
elty and oppression sway the world.

Now that Britain is at war, great
calls will be made upon us. It will
tax our powers to the utmost to
crush the foe. It is going to test
to the very depth of our national
life. We will have to make heavy sac-
rifices.

Many have given of their loved ones
the richest sacrifice. The giving of
money is an easy gift compared
with life. Our President in her mes-
sage urges us in the ever-present call
giving, not to let our generosity
at the expense of the Church and Mis-
sionary Society, but rather let the
cost of some pleasure, some in-
convenience, some luxury that we might
deem a necessity, be given. Shall
not each one of us join with the
boys at the front in making some
real sacrifice?

Looking at the state of the time
we ask:

"Is this a time to retrench or slacken?"

Market Square,

Napanee, Ont.

only one Auxiliary. Others have found high class Musical Cantatas and Recitals a good source of income. A "Crusade Day" and "Contests" were plans for increasing membership in all three societies. A personal invitation to every woman, girl and child in the Methodist Church was urged.

Four Auxiliaries report Systematic Giving, and four also give regularly to the Rest Fund.

One Auxiliary is organizing a Study Class, using the new Book, "The King's Highway," and holding open or public meetings as a means of creating more interest in Missionary work.

The Organizer's report followed. A new Auxiliary at Strathcona and re-organized circle at Enterprise, both doing excellent work, stand to her credit, besides the many visits and other work which has gone to make a very busy year.

Mrs. Geo. Finlay then read a stirring paper entitled "Our Talents" — (physical strength, mental ability, spiritual experience, time and money). How shall we trade with them? This very interesting and suggestive paper was prepared by Mrs. Dr. Irvine, of Lindsay.

The election of District Organized was the next order of business. The Convention learned just here with great regret that Mrs. John Wartman who had so ably filled this office for the past four years, had decided to retire.

After the usual proceedings Mrs. George Finlay, Strathcona, was elected for the ensuing year. Mrs. Finlay is probably the youngest organizer in the Branch, but well qualified to successfully meet the responsibilities of her office.

On behalf of the Moscow Auxiliary, Mrs. Rev. W. A. Bunner welcomed the delegates and visitors to Moscow church, and also extended hearty greetings to the returned missionary, Mrs. Rev. Geo. Simmons.

These greetings were responded to by Mrs. L. P. Wells, of Tamworth.

After the offering, and singing "Am I a Soldier of The Cross," the morning session was closed.

The local Auxiliary entertained right royally, providing a delicious lunch, after which the noon hour was spent socially.

Mrs. J. W. Wagar, Centreville, and Miss Carrie Jackson, of Enterprise, conducted the opening devotional exercises of the afternoon session.

During the afternoon a trio from the Moscow choir delighted the audience with a beautiful and appropriate selection.

Much credit is also due the little girls of the Moscow Mission Band and their leaders for the exceedingly well rendered and highly appreciated exercise in recitation and song.

Then followed the paper prepared and read by Mrs. Rev. E. Farnsworth, of Newburgh, "Is This a Time to Retrench in Missionary Effort?"

This topic, of such vital interest to both every man and woman in our church, was so ably dealt with in this clever paper that the Convention immediately expressed a desire that it be printed in full in our local papers.

IS THIS A TIME TO RETRENCH OR SLACKEN OUR ENERGIES IN MISSIONARY WORK?

A few months ago a subject on this question would never have been suggested, but at the present time, which is a most serious one, when our country is passing through such a trying ordeal as war inflicts, our minds turn to this subject.

The present time is a crisis in the history of our nation. It is a time when every continent of the world, and three quarters of the world's civil-

the richest sacrifice. The giving money is an easy gift compared life. Our President in her message urges us in the ever-present call giving, not to let our generosity at the expense of the Church and Missionary Society, but rather let cost of some pleasure, some ingencei some luxury that we deem a necessity, be given. She not each one of us join with the d boys at the front in making a real sacrifice?

Looking at the state of the ti we ask:

"Is this a time to retrench or slen our energies? To some this W war seems to challenge the claim Christianity as a religion for all m kind. The people who allow the sent European war to unsettle th faith, are poor students of the B and History.

It is true that Christainity will timately end in "Peace on Eart "He maketh wars to cease unto ends of the earth." "Nation sl not rise up against nation, neit shall ye learn war any more.

This dream of Universal Peace is revelation from God, who sits ab the war clouds and sees beyond centuries of human strife.

Isaiah prophesied the coming Peace; although at that time world was steeped in war. Its G were all "war gods" and its her were fighters. The story of Israel a nation, is a war story; they w always fighting, and what is true Israel is true in a larger scale w the other nations of the world. Fr the birth of Romulus to the days Caesar, a period of seven hund years, the Romans had not six ye free from war. Men had come to gard it as inevitable.

Into this dark world-strife, Bible sang a song of Peace, among a war cursed people pe Jesus came saying "Blessed are Peacemakers." The bible stands World Peace, and it is to come the result of the influence of Ch on the life of the world.

Education, good laws, invent may all help, but they are not i quate in themselves. A mightier fluence must be given. If men are learn to go to war no more, t must sit at His feet, whose com on earth as announced by any singing "Peace on Earth, Good to men." Christ is the Prince Peace. The Lamb slain from the fad nation of the world, is the gr Peace-offering of God.

But the bible also predicts v The most frightful picture and, phecy of war, came to us from Prince of Peace, who as He heard t cross on which he was to pay t price for world peace, lifts the cur, and bids us look at the frightful ture of world wars which must s be fought. So when the war Kings the earth, engulf the nations in stri Christain faith need not lose its h and conclude that the Bible has fail. It proves the truth of the Prophe The author of war is the Prince Darkness. It came in with sig a will never cease until sin is shak out of the earth. It began with t beginning of time, when Cain w the Red mark on his forehead, ca forth from Eden. Centuries past, y war abides. Must it go on? Yes, long as the Prince of darkness reig in the councils of nations and in t hearts of men. It must go on so lo as sin is dominant in this world ours.

But, some say, the gospel has be on trial for some thousands of yea and has proven a failure. No, not failure. Success has been postpone Why? Because the gospel has n been preached to every creature. this 20th century of the Christan et there are still twelve hundred millio of people who have not heard it. T Prophecy of Christ is not fulfilled t

d inhabitants are engaged in war. The centuries of human history are focused into months, by the tremendous tragedy that has come upon us. As millions see it, it is a struggle for humanity, a struggle for man liberty, Right against Might, Peace against War. It is not merely a war between Germany, Austria and Italy as against the Allies, but between civilization, with the right for peace, and peaceful development for both great and small nations on the one hand, and an intolerant military ambition for World Power, on the other. Taking this view, what wonder that we are highly resolved to carry the struggle to the bitter end.

It is true that it is a tragic hour the world's history; it is true that today is making demands on men, at no other day has ever made; it is not also true that it is the day of opportunity, a day that is with hope? The answer rests in the Christian Church. This is not a war of Brute force merely, it is the contending of great spiritual principles and ideals, in the interest of human Progress and Uplift.

The one source of comfort we have, at we as a nation are at war, is the Justice of our Cause. If the Leaders of our nation had cowardly shirked their responsibility, and the British Empire and Union Jack ceased to stand for Liberty, for Justice, for help for the weak and oppressed, we should have hung our heads in shame; a nation that regards not honor or duty would have avoided the war? The doomed Great Britain in the words of our Gracious Majesty King George were "Had I stood aside, I could have sacrificed my honor, and even to destruction the 'Liberties' of my Empire and of Mankind."

The question of the German Chancellor to the British Ambassador when you go to war just for a Scrap War, "was answered by Britain. 'Yes! for a scrap of Paper, we will fight,'

"Will our last breath, and God defend the Right. By God, by faith, by honor, Yes! we fight, to keep our names upon that Paper 'White.'"

When this war first broke out, the most desired by all was Peace. "Edward Grey never ceased to work for Peace. He proposed a conference of Ambassadors in London, and even at so far as to promise Germany an undertaking to safe guard her in any aggressive policy of France, Russia and England in the future. The greater offer was possible. The peace is clear. The responsibility is not at her door, and terrible as the war is, it would have been worse if Britain stood by and seen cruel and oppression sway the world.

Now that Britain is at war, great powers will be made upon us. It will be our powers to the utmost to sh the foe. It is going to test us to the very depth of our national life will have to make heavy sacrifices.

any have given of their loved ones, the richest sacrifice. The giving of money is an easy gift compared to our President in her message of the ever-present call of duty, not to let our generosity be the expense of the Church and Missionary Society, but rather let the love of some pleasure, some indulgence, some luxury that we might have, be given. Should each one of us join with the dear ones at the front in making some sacrifice?

Looking at the state of the times ask: Is this a time to retrench or slacken our energies? To some this world cause His Great Commission has not been carried out. If the teaching of Christ had been accepted generally, and his great commission carried out this war would have never come upon us.

If the so-called Christain Germany, which gave to the world the great Reformation, had been true to Christain principles, the barbarism of this war would have been impossible.

Then, if we have been guilty and fallen short in the past, surely this is no time to add to our guilt by entrenchment now.

This shaken 20th century needs just what the 1st century needed, the sacrifice of love, the redemption of the will and the humbling of the soul.

It is a time that calls themations of repentance and consecration. The conscience of the nations is being awakened and forward steps are being taken along moral lines. Intemperance has been put down, frivolous gatherings are few, and the many hours of unprofitable amusement are being filled with loving work for the soldiers. Then with the rising conscience of the nation, surely the conscience of the Church will not permit of retrenchment in Christain service. It calls for advanced effort.

In the face of this disastrous war all our material hopes are as nothing; the whole process of civilization is insufficient. Something more than worldly treasure of human words is needed. What have they to say and do for the soldiers bleeding and dying on the battle field? If the Church has only charities and asylums, hospitals and moral teachings, she is a failure. She must have a message of faith for the salvation of the soul, a Vision of the eternal life through Christ.

The Church was never more needed, and never had a larger and more difficult opportunity than now. Instead of the war turning the people away from religion, the gospel is making wonderful progress. In the trenches in the shadowed homes, they are seeking God, the only source of help. The many thousand wives and mothers are praying as they never prayed before, and we know prayer deepens the spiritual life.

The Red Cross Society is cementing the different denominations and classes as one, in the noble relief work being done.

Nor is the deepening of the Christain spirit confined to Europe. If we turn to the Mission fields we find, there too it has intensified religion. Recent letters from the Missionaries tell of the influence of the war, and the astonishment that the Christain nations should have so far forgotten Christ's teaching. And what would they think if Christain work slackened, if Missionaries were withdrawn and funds withheld? Then they might well say, Christain nations have lost faith in themselves and their God. As it is the work goes on. Instead of weakening, they are more glorious results than ever.

During the twelve months of the war, 7000 of the high officials of China have accepted Christainity, and have been organized in Bible classes. China has been proclaimed a day of prayer for the nations at war that peace may be established.

A wave of evangelism is sweeping across Japan. Ten thousand new converts are awaiting baptism in India. Uganda, in Africa, has become a Christain nation, and lately crowned its new ruler with Christain ceremonies. South Africa is awakening in a remarkable degree, and Korea is adding its thousands to the followers of the cross. What a power has this dear gospel of Christ. We know what it means to us. What a comfort in every phase of life. Shall we not

Historical Society.

The season's first meeting of the Lennox and Addington Historical Society will be held on Friday evening, October 20th, at 8 o'clock. Principal Maurice Hutton of the University of Toronto, will deliver a lecture on "German and British Ideas." The meeting will be held in Historical Hall and will be open for the general public.

Church Re-Union.

The first re-union of the season held in St. Mary Magdalene school room last Thursday evening was pronounced by every one there to be a great success. The Guild is noted for always having an excellent program on these occasions and as it is the intention, as in former years, to hold them about once a month. It is hoped the public will take advantage of this opportunity to spend a delightful evening.

ST. MARY MAGDALENE CHURCH

Rev. J. H. H. Coleman, M.A., Vicar.

Services at S. Mary Magdalene Church:

Sunday, October 17th will be observed by the church as "Children's Day." Every member of the Sunday School is asked to be in church (in the front seats) at 10.20 a.m.

10.30 a.m.—Holy Communion and short address to the young.

7.00 p.m.—Evensong. Sermon, "The Church and the Sunday School."

Lennox and Addington Motor Ambulance.

Any members of the committee of Women's Patriotic Service and Red Cross work through the Daughters of the Empire, as well as all working with the above in town and country, who have not had the opportunity of subscribing to the Lennox and Addington Motor Ambulance, and desire to do so, can still bring in their donations to the committee-room, in the Harshaw block, on Thursdays and Saturdays, or send same to Miss G. Alice Heck, Treasurer, John street, Nanpawee.

Trinity Church Notes.

The postponed Rally Day services will be held on Sunday morning next. The Sunday school will meet at ten o'clock and go into the church auditorium at 10.30, where the programme will be given. Every scholar, teacher, officer, and every member and adherent of the church is expected to be present. In the evening the pastor will preach on "Lessons from the life of Jacob." Jacob is one of the most interesting characters of the Bible, and many practical lessons for the life of society may be carried from the story of his life. Be sure and be present at the evening service.

TRAFALGAR DAY.

Thursday, October 21st. In Commemoration of this great day in British History, which this year is to be observed throughout the Empire; the Ladies of the 185 Telephone Line, Morven have most kindly consented to serve afternoon tea for the Daughters of the Empire, and

richest sacrificed. The giving of money is an easy gift compared to ours. Our President in her message gives us in the ever-present call of vining, not to let our generosity be the expense of the Church and Missionary Society, but rather let the st of some pleasure, some indulgence some luxury that we might em a necessity, be given. Should t each one of us join with the dears at the front in making some al sacrifice?

Looking at the state of the times ask:

Is this a time to retrench or slacken our energies? To some this World seems to challenge the claim of Christianity as a religion for all mankind. The people who allow the present European war to unsettle their faith, are poor students of the Bible d History.

It is true that Christainity will ultimately end in "Peace on Earth." It maketh wars to cease unto the ds of the earth." "Nation shall t rise up against nation, neither all ye learn war any more.

This dream of Universal Peace is a vation from God, who sits above e war clouds and sees beyond the sturies of human strife.

Isaiah prophesied the coming of ace; although at that time the rld was steeped in war. Its Gods re all "war gods" and its heroes re fighters. The story of Israel as nation, is a war story; they were ways fighting, and what is true of rael is true in a larger scale with e other nations of the world. From e birth of Romulus to the days of usar, a period of seven hundred ars, the Romans had not six years e from war. Men had come to reard it as inevitable.

Into this dark world-strife, the ble sang a song of Peace, and nong a war cursed people people us came saying "Blessed are the acemakers." The bible stands for rld Peace, and it is to come as e result of the influence of Christ i the life of the world.

Education, good laws, invention ay all help, but they are not adeate in themselves. A mightier inence must be given. If men are to arn to go to war no more, they ust sit at His feet, whose coming i earth as announced by angels aging "Peace on Earth, Good Will i men." Christ is the Prince of ace. The Lamb slain from the foun. tion of the world, is the great ace-offering of God.

But the bible also predicts war e most frightful picture and, propcy of war, came to us from the ince of Peace, who as He neared the oss on which he was to pay the e for world peace, lifts the curtain id bids us look at the frightful picre of world wars which must still ight. So when the war Kings of e earth, engulf the nations in strife, eistian faith need not lose its head id conclude that the Bible has failed, proves the truth of the Prophecy, e author of war is the Prince of uckness. It came in with sin and ll never cease until sin is shaken t of the earth. It began with the ginning of time, when Cain with e Red mark on his forehead, came th from Eden. Centuries past, yet r abides. Must it go on? Yes, so g as the Prince of darkness reigns the councils of nations and in the arts of men. It must go on so long sin is dominant in this world of rs.

But, some say, the gospel has been trial for some thousands of years, d has proven a failure. No, not a lure. Success has been postponed, hy? Because the gospel has not n preached to every creature. In s 20th century of the Christain era, re are still twelve hundred millions people who have not heard it. The pphesy of Christ is not fulfilled be-

been organized in Bible classes. China has been proclaimed a day of prayer for the nations at war that peace may be established.

A wave of evangelism is sweeping across Japan. Ten thousand new converts are awaiting baptism in India. Uganda, in Africa, has become a Christain nation, and lately crowned its new ruler with Christain ceremonies. South Africa is awakening in a remarkable degree, and Korea is adding its thousands to the followers of the cross. What a power has this dear gospel of Christ. We know what it means to us. What a comfort in every phase of life. Shall we not send it to others. A lady not far from here, and not an active missionary woman, told me once that she could never bear the burdens of her life without the help of Christ. I wonder if she ever thinks of the heathen sister, who has burdens also, and yet knows not Christ. This is the real test of our Religion, a desire to pass it on to others.

"Is this the time Oh Church of Christ, to sound Retreat? To arm with weapons cheap and blunt The men and women who have borne the brunt Of truth's fierce strife, and nobly held their ground?"

No! Rather strengthen stakes and lengthen cords, Enlarge thy plans and gifts, O thou elect, And to thy Kingdom come for such a time! The earth with all the fullness is the Lord's, Great things attempt for Him, great things expect! Whose love imperial is, whose power sublime."

The Convention was honored in having an excellent address from Mrs. Simmons, a returned missionary (in connection with the Anglican Church) who, with Rev. Mr. Simmons, is home on furlough from Honan, China.

She said their work in China is very much like our own. She gave a synopsis of her work, and emphasized the great need of the prayers of the home friends for all the missionaries! Another thing she mentioned was the harmony in which all the denominations worked in that far off land, and of the great blessings that come to the Chinese through coming in contact with the gospel and civilization.

A lively discussion on three very important questions followed, led by Mrs. Wartman, in the absence of Mrs. A. W. Grange.

1st—How can we make this convention a help to the district?

2nd—How can the Auxiliaries assist the Organizer?

3rd—What shall we teach our Bands?

In answer to the first question we were told to pass on to our individual Auxiliary all the good we learn at the Convention.

To the second, we are to pray for our Organizer, and to report promptly, carefully and correctly.

And to this last came the answers: Teach our Bands to pray for our missionaries as we pray for our soldiers; to GIVE systematically; to take the Palm Branch, and to know our missionaries names, and where stationed.

A vote of thanks was tendered to Mrs. Simmons, and also to the Moscow Auxiliary, for their kindness, and to all who in any way contributed to the success of the Convention. Carried by a standing vote.

Mrs. Jas. Wilson, Strathcona, on behalf of the District, welcomed the new organizer, Mrs. Finlay, transferring the allegiance of the District to her. She also expressed the voice of the Convention in loving words of appreciation for our retiring organiz-

er, Mrs. Wartman. This was seconded by Mrs. Metzler, and also carried by a standing vote. Mrs. Wartman replied feelingly to the kind words and wishes. An invitation from Centreville for next year was extended, and accepted. The receipts for the day amounted to \$36.63 (less expenses). The benediction closed one of the most successful Conventions in the history of the District.

THE IMPORTANCE OF GRAIN SCREENINGS

Weeds—seeds made up of 16 per cent. of the total weight of a car of western grown flax. A sample representing over 25,000 bushels of wheat contained only 92.6 per cent by weight of pure wheat, the remainder being largely made up of weed seeds. Such are the statements embodied in a pamphlet issued by the Seed Branch of the Department of Agriculture at Ottawa and that can be had gratuitously by addressing the Publications Branch of the same department.

The pamphlet is entitled "Grain Screenings" and R. Dymond, B.A., Seed Analyst, is the author, he having been assisted in the work by E. S. Archibald, B.A., B.S.A., Dominion Poultry Husbandman, who contribute "Results of Feeding Experiments" at the Central Experimental Farm. These are given with elaboration of detail that add much to the pamphlet, which the dedicatory announcement truly says "is of importance to all concerned in the production, handling and uses of grain and its products."

The heads of the different sections into which the pamphlet is divided are: Composition of Screenings, Uses of Screenings, Grinding Screenings, Screening in Feeding Stuffs, Flax seed screenings and Feeding Experiments. The last mentioned were made most thoroughly with cattle, sheep, swine and poultry and the conclusions reached are elaborately tabulated. The importance of proper screening to the grain grower, the merchant, miller and feed manufacturer is minutely detailed and a summary given, in which it is set forth:—

That the material removed from grain at terminal elevators consists of shrunken and broken kernels of wheat, oats, barley and flax, besides varying proportions of a very large number of weed seeds.

That up to the present, most of the screenings from our terminal elevators have been exported to the United States, where they have been reclaimed and used in various forms in feeding live stock.

That on account of the extremely small size of some, and the hard flinty seed-coats of others, the complete pulverization of all of the weed seeds in screenings cannot be accomplished by an ordinary chopper.

That screenings reclaimed over a one-fourteenth inch perforated zinc screen to remove the finer weed seeds (black seeds) may be satisfactorily ground by ordinary choppers, if reasonable care is taken in the separation and grinding.

That feeding stuffs manufactured from screenings, not properly reclaimed, sometimes contain thousands of vital noxious weed seeds per pound. Such material should never be fed as it is liable to introduce weeds that entail the loss of thousands of dollars.

That feeding experiments have proven that the black seeds are useless as feed, and expensive as adulterants. The admixture in any considerable

al public. Particulars are given of amendments to the Destructive Insects and Pest Act. Information is also conveyed relative to trading with the enemy. Summaries of reports regarding dairy operations will be found of value, especially as regards arrangements for refrigerator car service, for the proper carrying out of which by the railway companies the department holds itself responsible. From May to October the railways in Ontario, Quebec and Nova Scotia must run refrigerator cars weekly or fortnightly for the carriage of butter at regular rates and without extra charge for icing. Commencing from the middle of June and for eleven weeks hence the department pays icing charges up to \$5 per car for the conveyance of cheese. Similar arrangements are in force for the carriage of fruit from August 1st to October 1st. The work of the Seed Commissioners' Branch, which gains in importance yearly, is told in detail, as is that of the live stock branch, the activities of which are farther reaching than ever they were. A full account of the grading of wool is given. Reports from all the Dominion Experimental Experimental Farms and stations indicate the wide scope of the work what is being done and the remarkable variety of tests and experiments that are undertaken. This part of the report will be found especially enlightening relative to the comprehensive nature of the operations at the farms and stations. Details of the proceedings of the fruit and entomological branches are deserving of minute attention, being both instructive and useful. The Publications Branch, from which a complete report can be obtained free, also receives attention as does the branch of the Canadian commissioner of the International Institute of Agriculture. Particulars are given regarding the issuing of patents of invention and a summary of the work of the public health and also of the health of animals branch under the direction of the veterinary inspector general, Dr. Torrence. An appendix contains the reports of the director-general of public health and his staff and of Canadian Exhibition Commissioner, Wm. Hutchison, relating to Canada's exhibit at the Panama exposition, San Francisco. It also gives the text of the British order in council restricting the importation of dogs, all of which have now to be licensed to land.

The Red Cross Society

The adjourned public meeting of the Napanee Branch of the Canadian Red Cross Society was held last Saturday afternoon, when the following conveners were elected:

The Woollen Committee—Mrs. W. S. Herrington.

The Cutting-out Committee—Mrs. A. Woods.

The Giving-out Committee—Mrs. G. Hawley.

The Finance Committee—Mrs. C. Maybee.

The Refreshment Committee—Mrs. J. W. Robinson.

The Buying Committee—Mrs. W. Pruyn.

The Society acknowledges with thanks, a donation of fifty dollars, from the Selby Red Cross, to be applied on the purchase money of the Lennox and Addington Motor Ambulance. Will all Red Cross workers, who are willing to help with the payment of same, kindly send in their donations as soon as possible?

Napanee Public Schools

Group Standing for Sept. 1915

Group standing of pupils, of Napanee Public Schools. Group (A), excellent; group (B), Good; group (C), Fair; group (D), Poor.

Group (A)—Marion Wales, Stinson, Harry Clancy, Geo. F. Rachel Kelly, Fred Russell, M. Brown, Wm. Judson, Marjorie J. Stinson.

Reaching the People

A prominent real estate dealer in Toronto says that he gets better and quicker results from the Classified Want Ads. than from any other kind of publicity. He states that the results are out of proportion to the small expense involved.

There is a moral in that for you if you want to reach the people.

(black seeds) may be satisfactorily ground by ordinary choppers, if reasonable care is taken in the separation and grinding.

That feeding stuffs manufactured from screenings, not properly re-cleaned, sometimes contain thousands of vital noxious weed seeds per pound. Such material should never be fed as it is liable to introduce weeds that entail the loss of thousands of dollars.

That feeding experiments have proven that the black seeds are useless as feed, and expensive as adulterants. The admixture in any considerable quantity to other feed makes it unpalatable for all kinds of stock.

That screenings without the black seeds, may be fed freely to horses, cattle, sheep or swine, but it is more profitable to have such screenings compose not more than 50 to 60 per cent. of the total grain ration. Buckwheat screenings are especially valuable as poultry feed.

That more attention to the cleaning of grain as it is threshed will save the cost of transporting the screenings to terminal elevators, and will leave the grower in possession of much valuable feed which, if he does not need for his own use, will find ready sale among live stock men.

That the growth of weeds entails an enormous loss each year to farmers, and while it is desirable to utilize everything in grain screenings of good feeding value, it would be better to burn them than to permit their use in ways that will bring about an increase in the number or distribution of noxious weeds.

THE FEDERAL DEPARTMENT OF AGRICULTURE.

The report of the Minister of Agriculture for Canada for the year ending March 31st, 1915, is a full and complete story of the operations of the Department in all its divisions and branches. It is consequently a very informative publication. Indeed there is a deal in the report of which every municipal officer as well as every one interested in agriculture and the public health might advantageously become possessed. In particular has this reference to the regulations relating to tuberculosis formulated for the purpose of ensuring a pure and wholesome milk supply for cities and towns, especially to prevent the sale of milk from tuberculous cows. In this connection it might be mentioned that the department undertakes, through the veterinary director-general, to aid any city or town acting under the regulations to carry them out and to control bovine tuberculosis. Owners and managers of cold storage plants are reminded that under an order in council of 20th of June, 1914, they must give the public the preference in the use of refrigerated space and must not contract to give said space to one firm to the exclusion of the said gener-

Howley.

The Finance Committee—Mrs. C. Maybee.

The Refreshment Committee—Mrs. J. W. Robinson.

The Buying Committee—Mrs. W. Pruyd.

The Society acknowledges with thanks, a donation of fifty dollars, from the Selby Red Cross, to be applied on the purchase money of the Lennox and Addington Motor Ambulance. Will all Red Cross workers, who are willing to help with the payment of same, kindly send in their donations as soon as possible?

The usual work-meeting of the Society will be held on Saturday afternoon, when afternoon tea will be served. The rooms will also be open in the morning.

Women's Patriotic Service and Red Cross Work

Through the Daughters of the Empire.

In accordance with the notice appearing in this column last week, the Commemoration for Trafalgar Day on the 21st October, will take the form of a Hospital Supply Shower for the Navy, suggestions for the Supply Shower will be found in another column under head of Trafalgar Day, with other particulars.

Another appreciative acknowledgement of Cases received from the Committee has just come to hand from Dr. Donald Armour, Surgeon-in-chief of the Queen's Canadian Military Hospital at Shorncliffe, England. Also an interesting letter from Lieut. B. R. Simpson, who soon expects to go to France.

Our room is open each Thursday and Saturday afternoon until 5.30 o'clock when we are glad to see workers and visitors.

EDISON WEEK

In the United States and Canada, from Oct. 15th to Oct. 23rd, 1915, in honor of the greatest inventor. The Edison Diamond-Disc Phonograph is his especial pride. R. B. Allen, Napanee, controls the selling rights of this greatest of all musical instruments, between Kingston and Belleville, and will demonstrate at "Wonderland" 19th, 21st and 22nd—Edison Week, and at Allen's "Music Hall," Market Square, every evening all week. Everybody welcome.

BARS TO CLOSE AT 8 p.m.

Toronto, Oct. 14.—All Ontario bars will be closed at 8 o'clock, commencing November 1st, and on Saturdays at 7 p.m. as usual.

What will you do for these?

MAGNIFICENT soldiers and sailors from every part of the British Empire are laying down their lives for you and yours. Perhaps some of your own blood are amongst them.

An urgent appeal has gone forth from the Marquis of Lansdowne, President of the British Red Cross, for funds to provide medicines, appliances, comforts, and hospital equipment of all kinds to alleviate the sufferings from wounds and sickness of sailors and soldiers from all parts of the Empire. This appeal is endorsed by their Majesties, the King and Queen, and every British possession is setting aside, by official proclamation

"Our Day" For Sailors and Soldiers Oct. 21

as a day of public giving to aid in this splendid cause, which stands in severe need of assistance owing to the tremendous demands upon Red Cross work.

Ontario's Quota is set at \$500,000

We can and will raise this amount as a token that Ontario feels for our wounded heroes and will not see them languish in their pain and suffering for the want of medical and other comforts. Do your part and make "Our Day for Sailors and Soldiers" a tremendous success in your locality.

"We shall be truly grateful to you for assistance in relieving the sufferings of our wounded soldiers and sailors from all parts of the Dominions."

Lansdowne,
President British Red Cross Society

"This is the first appeal of the Motherland to Canadians in this present war. It calls upon our humanity as well as our loyalty."

John S. Hendrie,
Hon. Sec. of the Ontario Red Cross

"This is the first appeal of the Motherland to Canadians in this present war. It calls upon our humanity as well as our loyalty."

John S. Hendrie,
Lieut.-Governor of Ontario.

Give to the Red Cross

Every cent collected goes to British Red Cross headquarters, where it is officially and wisely spent. No money is wasted in expenses, even this advertising space is donated by the publishers.

Give a day's pay. Do your part. Give liberally and loyally. Give your money, because these brave ones—our sailors and soldiers, are giving their lives for us. Collectors on October 21 will solicit your subscription—or make it through your Mayor or Reeve.

TO THE CITIZENS OF NAPANEE :—

For the first time in the history of the Empire, Great Britain has made a direct special appeal to the Canadian people for help. This is due to the extraordinary situation that has arisen in regard to the British Red Cross, which is confronted with the immediate necessity of raising an immense amount of money owing to the tremendous drain upon its treasury. Lord Lansdowne, a former Governor-General of Canada, is at the head of the movement, and the Lieutenant-Governor of Ontario has taken into his hands the responsibility for the action of the Province of Ontario. We have been calling upon the motherland for aid ever since the province was first settled. Shall she now appeal to us in vain? At a public meeting held on Tuesday evening collectors were selected for the town and the canvass will be made on Trafalgar Day, Thursday, the 21st instant. This movement is not to be confused with the local branch of the Canadian Red Cross Society. This is a national work and every colony in the Empire is taking it up. There were 21,000 casualties among the British troops during the first ten days of the present month. Have we an intelligent appreciation of these figures? The grim harvest of these ten days would fill every hospital in Canada. If we saw a procession of four hundred ambulances, each containing four wounded soldiers pass our door every morning, then perhaps we would understand this urgent need for help. That is precisely what is daily taking place behind the trenches in Europe. These suffering, wounded lads are fighting our battles to preserve our homes, and it is from them that the call for help comes from over the sea. The citizens of Napanee should give freely and cheerfully to such a cause. Many appeals have already been made, but how many of us have yet given what we should? Every Municipality in Ontario will be canvassed in a similar manner. What will Napanee do? If we gave our proportionate share of the entire amount asked for we would give in the neighborhood of \$1000. Let us aim to raise that amount. If we cannot shoulder a rifle and go to the front, the least we can do is to assist in relieving the suffering of those who do go. We cannot measure in dollars and cents the debt of gratitude we owe the boys in the fighting line. Get your money ready and leave it at your residence for the canvassers. Make their work as light as possible. They are busy men and should not be required to call a second time for your contribution. Greet them with a smile and give liberally as is your duty. They are doing their duty, you do yours. The cash will be forwarded to the Lieutenant Governor immediately upon the receipt of the report of the canvassers. It is to be hoped that that report will be unanimous and to the effect that there are no shirkers in Napanee.

Yours sincerely,

W. S. HERRINGTON,
 Chairman of Committee.

GET IT AT
WALLACE'S

MAGIC COAL TAR.

Once Despised, It Is Now a Source of Limitless Products.

SPANS THE WORLD OF COLOR.

It Yields Almost Every Shade or Hue and is Used in Practically Every Industry—In Medicine and Surgery. Also, It Has Worked Wonders.

Among the almost limitless number of natural products of this country coal tar stands well in the lead in the variety of uses to which it may be applied. Evil smelling, it is the rough material from which many valuable substances have been obtained after years of persistence by science and industry.

These substances include a wide range of colors, various burning and lubricating oils, asphalt for pavements, photographic developers and a great number of medicines, flavors and perfumes. Coal tar is used in practically every manufacturing process where dyes are needed, in making cloths, silks, dress materials, colored papers and even colored articles of food.

About a century ago coal tar was considered almost a waste product, and no one had thought it worth while to experiment with it. At that time gas was being introduced as a new light, and Frederick Accum, who wrote one of the first books on gas lighting, suggested the boiling of the tar in a still and the condensation and collection of the volatile products. The experiment was made, and the process yielded two oils. One was heavy and the other light. It was soon found that the heavy could be satisfactorily used as a preservative for wood that had to be fixed underground or submerged in water and was used extensively in preserving piers and wharfs.

Further experiments with the lighter oil were made by a Scotch chemist, Macintosh, who used it in waterproofing the clothing which still bears his name. It also is used as a solvent in varnish making and as coal naphtha for lighting. Experiments with naphtha disclosed a rich treasury of colors which for centuries had been locked up in coal and its refuse—tar. Benzine was extracted from naphtha and this in turn produced the different shades of violet, green, blue and yellow. Later another chemist made the commercial manufacture of benzine possible. He was experimenting on the artificial production of quinine, and, using a base known as aniline, obtained the coloring matter called mauve.

This laid the foundation for the coal tar color industry which has developed until today almost every color and shade of color is derived from aniline. Aniline had been obtained previously from the indigo plant "anil." The discovery of mauve created a large demand for the artificial aniline base and gave unexpected value to benzine. It yielded aniline by being treated with nitric acid and with the borings of cast iron powdered into dust. Having done its work in the aniline still, the dust was used by the gas maker to cleanse his coal gas from sulphur, and then it passed to the manufacturing chemist, who burned the sulphur out of it and produced sulphuric acid—a cycle of op-

MEASURED BY INCHES.

Tiny Things Sway Calamity or Success in Human Affairs.

Everybody knows what a little thing an inch is, but few realize what a big thing it is. Few stop to contemplate what the difference in an inch really means. A tailor knows when an inch too much or too little has cost him anywhere from \$18 to \$80. A dress-maker knows when an inch too little of the goods on hand may cause her, after an arduous day of planning, to abandon a chosen pattern for another. An engineer knows when his train, with its carload of human freight, has gone one inch off the track over a precipice.

Some men have minds one inch off the judgment track, and that causes all their schemes, gigantic and brilliant as they may be, to run amuck.

Every calamity and every success in life is controlled by inches.

Men rarely go to their doom in an hour. It is inch by inch.

All successes are won inch by inch.

As inch by inch the waters of life creep in to engulf us, so inch by inch the obstacles that impede our progress move aside.

The man who attempts to leap over the inches to reach his goal gets there with a broken leg.

The word inch has a forbidding sound. It is because it holds us in its clutches. We cannot ignore an inch or it immediately thwarts our intentions. Every simple thing is performed by man, as the saying goes, "with-in an inch of his life."

All diseases move inch by inch. Before the scarlet fever breaks out in a child it has been developing inch by inch for nine days.

The overstepping of an inch in the proprieties of life brands us. If a girl in a theater laughs an inch too loud the audience looks around and puts upon her the stamp of "not a lady."

Depression is measured by inches, and woe unto the man who fails to observe its dictates. Even in the deepest grief if one goes too far in his wallings the grief is questioned, if not ridiculed, and sympathy turned aside. An inch too far in the poet's flight to imagination's realms and the world laughs at his best efforts.

A single inch in any direction may throw away a man's chances for the world's approval, and yet some men do not even consider the yards.

It is the man who considers life within an inch of every detail presented who succeeds.—New York American.

Record Gales.

There have been terrific gales in various places all over the world. In many instances it is, of course, impossible to obtain any exact record of the velocity of the wind, but the highest ever recorded was reported from Cape Mendocino, Cal., in January, 1886, when the anemometer registered 144 miles an hour.

At Cape Lookout, on the Atlantic coast, there is no telling what the record force of the wind might have been had not the anemometer blown away after registering 138 miles an hour. This fearful hurricane hit the middle Atlantic coast on Aug. 17, 1879.

In June, 1881, a wind of 112 miles was recorded on top of Pike's Peak, Colorado.—Chicago Herald.

HE STRUCK IT RIGHT AT LAST

After Suffering Almost Two Years, "Fruit-a-tives" Brought Relief.

MR. WHITMAN
882 St. Valier St., Montreal.

"In 1912, I was taken suddenly ill with Acute Stomach Trouble and dropped in the street. I was treated by several physicians for nearly two years. I was in constant misery from my stomach and my weight dropped down from 225 pounds to 160 pounds. Several of my friends advised me to try 'Fruit-a-tives' and I did so. That was eight months ago. I began to improve almost with the first dose. No other medicine I ever used acted so pleasantly and quickly as 'Fruit-a-tives', and by using it I recovered from the distressing Stomach Trouble, and all pain and Constipation and misery were cured. I completely recovered by the use of 'Fruit-a-tives' and now I weigh 208 pounds. I cannot praise 'Fruit-a-tives' enough". H. WHITMAN.
50c. a box, 6 for \$2.50, trial size, 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

CHINA'S FIRST LOCOMOTIVE.

Wily Old Li Hung Chang's Rebuke That Was Linked With a Wink.

There is a curious story concerning the first locomotive ever seen in China. Li Hung Chang was given permission to construct a railway from the sea to his mines upon the condition that steam power should not be used, and for several months the cars were hauled by mules.

Then Mr. Kinder and some of the foreign machinists secretly constructed a locomotive out of such material as they could find in China. It was a rude affair, and it was never able to make more than five or six miles an hour, but it was a great advantage over the mule teams, for it could haul seven or eight cars of coal at that speed, where it took four mules to haul one.

But when the mandarins at Peking learned that foreign devils were using a fire eating monster on the railway they immediately made a tremendous fuss about it and called Li Hung Chang to account for violating his concession.

The old gentleman took it very coolly and pretended not to know anything about it, but he afterward restored himself in favor by issuing an order rebuking Mr. Kinder and his associates.

MONKEY ANTICS.

The Orang Outang Is a Creature of Great Imitative Ability.

In hotels and private houses of Ind monkeys have been found that were trained to wait at table, bringing dish and articles of food in a more or less mechanical way.

The story of the talented orang outang of Buffon, the naturalist, is classic. This creature gave visitors his arm walked with them, showed them to the door, ate with a knife and fork and drank from a glass, poured tea into a cup, sweetened it and waited till cooled before he drank it.

An orang outang at the Jardin d Plantes in Paris regularly unlocks with a key the door of the compartment he occupied, opened the door, locked it on the other side after he had entered and then hung the key on a nail.

Flourens relates that he once visited the Jardin des Plantes in company with an aged scholar whose appearance greatly interested this orang outang which was at large in the rooms of the institution. The scholar wore old fashioned clothes, one article of which was a tall hat with a wide brim. He was much bent from age and in walking supported himself with a heavy cane.

When the two men were about to depart the hat and cane of the old man were missing. Presently the orang outang was seen tottering through the room, his back bent almost double wearing the hat upon his head and walking stiffly by the aid of the cane. Chicago Herald.

MADISON SQUARE GARDEN.

Story of the Growth of a Famous New York City Landmark.

Madison Square Garden, indissolubly associated with the city of New York was purchased in 1853 by the Harlem railroad after the extinction of the old eastern post road, which ran diagonally across the block. In 1854 the railroad company put up sheds for the handling of the early morning milk supply and farm products.

In 1863 the train sheds were rebuilt to house a passenger terminal of the Harlem on Twenty-sixth street and the New Haven road on Twentieth street, the trains being broken up at the present Grand Central and the separate cars being drawn down by mules.

The railway ceased to use the building in 1871, and in 1873 it was removed and leased to Barnum for the congress of nations. Sheridan Shook and Patrick Gilmore, in joint conduct of museum, were the next tenants. Barnum returned with the circus and in manager April 27, 1874. Gilmore took the place for the next season and produced the first of his concerts May 21, 1875.

On May 31, 1879, the place was first designated Madison Square Garden. The tearing down of the old building was begun Aug. 7, 1880. The present structure was formally opened June 16, 1890.—Argonaut.

Health For Canaries.

Even a canary must be cared for judiciously if its life is to be happy. Regular exercise outside its cage is desirable, if its owner has time to look after this exercise. A scrupulously clean cage, fresh water and seed every day, greens of some sort—lettuce, celery, plantain—once or twice a week and enforced abstinence from sweet

color industry which has developed until today almost every color and shade of color is derived from aniline. Aniline had been obtained previously from the indigo plant "anil." The discovery of mauve created a large demand for the artificial aniline base and gave unexpected value to benzine. It yielded aniline by being treated with nitric acid and with the borings of cast iron powdered into dust. Having done his work in the aniline still, the dust was used by the gas maker to cleanse his coal gas from sulphur, and then it passed to the manufacturing chemist, who burned the sulphur out of it and produced sulphuric acid—a cycle of operations whose beginning and end was the utilization of waste.

This method of producing color was responsible for the desolate madder fields of France and Holland and for the loss to the Hindus of their long cherished indigo cultivation. Anthracene, one of the heavier oils of coal tar, caused the fall of the madder growing industry. The madder produced violets, reds, blacks, purples and dark browns. Anthracene was sold very cheaply for lubricating purposes until certain chemists heated it with zinc filings and produced alizarin, and then the secret of the madder plant was discovered.

In this way chemistry displaced agriculture, one pound of alizarin having the coloring power of ninety pounds of madder, and the lubricating oil sold at a trifle as waste became a valuable coloring matter worth \$500 a ton, thereby creating a vast industry.

In medicine and surgery coal tar has worked wonders. Saccharin, many hundred times the sweetening power of sugar, is used by diabetic patients. Carbolic acid is separated from the oil of coal tar by successive distillations, and in surgical operations a spray of germ killing carbolic acid is used. Quinoline, antipyrine and other fever assuagers are made from coal tar, and various antiseptics and food preservatives also are obtained from it.

Vanilla flavoring for cooking, which formerly was prepared from a bean, can now be obtained from the vanillin of the gas works, and even this vanillin can be made into a hellebore perfume by adding oil of almonds, while the latter can be produced by treating benzine with an acid. Huge quantities of this oil are used in the making of scented soaps. As a matter of fact there is scarcely a department of life into which the products of coal tar do not enter.

Always on the Go.

"That man never seems to stay long at any one place. What is he doing, anyway?"

"He is helping to take a census of the birds."

"On, that accounts for his being constantly on the wing."—Pittsburgh Press.

We must make our election between economy and liberty or profusion and servitude.

Imagination.

"A poet needs a great deal of imagination."

"Yes; if he really waded around in the wet grass looking at sunrises and listening for robins he wouldn't last long enough to write much poetry."—Washington Star.

Limitations.

Jack—I hear that you have quit the literary game. Jill—Yes; I despaired of ever writing up to my publishers' printed estimates of my work.—Life.

velocity of the wind, but the highest ever recorded was reported from Cape Mendocino, Cal., in January, 1886, when the anemometer registered 144 miles an hour.

At Cape Lookout, on the Atlantic coast, there is no telling what the record force of the wind might have been had not the anemometer blown away after registering 138 miles an hour. This fearful hurricane hit the middle Atlantic coast on Aug. 17, 1879.

In June, 1881, a wind of 112 miles was recorded on top of Pike's Peak, Colorado.—Chicago Herald.

Magazines in Warships.

If there is one danger that sailors dread more than any other it is an explosion in the powder magazine. To prevent such an occurrence a device for flooding that compartment in the least possible time is fitted to most big battleships. A pipe below the surface connects the magazine with the sea. This pipe is closed by two taps, which are connected with the deck. In case of danger it is only the work of a minute to open the taps, let the sea rush in through the pipes and flood the magazine. The water is afterward drained off by means of a gutter.—London Mail.

Nor So Often.

With hungry people the table is not of so much consequence as the spread.

A very fat man who had just retired from the grocery business was one day thus mischievously greeted by a friend: "I say, old man, you are failing since you retired! You have got so thin I scarcely knew you!" "Perhaps so," replied the grocer. "I certainly don't weigh so much as I did when I was in the grocery trade!"—St. Paul Pioneer Press.

Slaves to Success.

Rebellion and stubbornness—how they hinder and hinder and spoil our work! If a girl is going to master music she must first become its slave, surrendering her whole being to the principles and the ideals of music. If a boy is to master a trade or a profession he must give himself up to it. If a man is to be a great leader of the people he must surrender himself to the welfare of the people.—Christian Herald.

A Brief Introduction.

Mark Twain said the only introduction to a literary audience that seemed to him the right word in the right place, a real inspiration, was as follows:

"Ladies and gentlemen, I shall not waste any unnecessary time in the introduction. I don't know anything about this man—at least I only know two things about him. One is that he has never been in prison, and the other is I can't see why he hasn't."

Approval.

"You approve of your wife's public speaking?"

"Yes," replied Mr. Meekton. "I'd rather she told her views about economics and sociology to the throng than have her handing them out to me as little bedtime stories."—Washington Star.

A Bird.

Peggie—Why do you say he is a bird? Polly—Well, he is chicken hearted and pigeon toed, has the habits of an owl, likes to wear a swallow tail coat and collars with wings, he is always acting the goose and he is a perfect jay.—Judge.

hour, but it was a great advantage over the mule teams, for it could haul seven or eight cars of coal at that speed, where it took four mules to haul one.

But when the mandarins at Peking learned that foreign devils were using a fire eating monster on the railway they immediately made a tremendous fuss about it and called Li Hung Chang to account for violating his concession.

The old gentleman took it very coolly and pretended not to know anything about it, but he afterward restored himself in favor by issuing an order rebuking Mr. Kinder and his associates for their presumption and forbidding them to introduce any more new fangled foreign notions into China. Shortly after he secretly patted them on the back and raised their pay.

The excitement quieted down and was soon forgotten. Then Mr. Kinder got up steam in his clumsy old engine again and was allowed to run it without interference. Later a couple of regularly made locomotives were imported from Europe and have since been hauling the coal trains on that road.

ELECTRIC SPARKING.

Light on a Puzzle That Has Worried Many Car Owners.

It is a sad and common experience to men in motorboats, automobiles, etc., to find that something is wrong with the spark. Often it is the case that when the spark plug is taken out and tested in air it shows up all right, and will ignite gasoline poured around it, but when put back into position it will not work. This is a puzzle to a great many people today.

The reason lies in the simple fact that the spark, when it takes place in the cylinder, has to spark in compressed gas, and when in the air it doesn't. It is a well known scientific fact that the pressure of the gas determines how far a spark will jump under a given voltage. If the spark jumped a quarter inch in the open air and was placed in a vessel with most of the air pumped out, it would jump several inches; and, on the other hand, if placed in compressed air it would not jump more than a fraction of the quarter inch. Of course the thing to do in the circumstances is to get new batteries, and if so situated that that is impossible the two little terminals of the spark plug should be pushed closer together. Then the spark will pass in the compressed gas inside the cylinder.

If explosion does not take place then the spark is probably so small that it is wholly immersed either in air or in the gasoline vapor, and to have an explosion it must be immersed in a mixture of the two. The carburetor should then be tinkered with. The probabilities are that a part of the time explosions will take place and will be sufficient to keep up a forward motion at reduced speed.—Chicago Herald.

Literary Inspiration.

It is enough to stun and scare anybody to have a hot thought come crashing into his brain and plowing up those parallel ruts where the wagon trains of common ideas were jogging along in their regular sequence of association. A lyric conception hits me like a bullet in the forehead. I have often had the blood drop from my cheeks when it struck and felt that I turned as white as death. Then comes a creeping as of centipedes running down the spine, then a sudden flush and a beating in the vessels of the head, then a long sigh and the poem is written.—Holmes.

On May 31, 1879, the place was first designated Madison Square Garden. The tearing down of the old building was begun Aug. 7, 1880. The present structure was formally opened Ju 16, 1890.—Argonaut.

Health For Canaries.

Even a canary must be cared for deliciously if its life is to be happy. Regular exercise outside its cage is desirable, if its owner has time to look after this exercise. A scrupulous clean cage, fresh water and seed every day, greens of some sort—lettuce, cress, plantain—once or twice a week, and enforced abstinence from sugary sweet biscuits and other odds and ends that are often fed to birds—the details insure health and, therefore, happiness to the caged bird. Perhaps the fact that it is caged, that it has few ways of making its wants known should make its owner more careful of its health than she would be even the health of a dog or cat.—New York Sun.

Pictures In Gardens.

Above most other arts, landscape architecture is based on nature, and the art should be practiced on natural lines. The evolution of growing things, the development of distinct types, effect, although greatly varied, can and should be, made to bear a stamp alike of definite, though perhaps instinctive, ideas throughout the various kinds of landscape gardening, whether it be a park, an estate, a large garden or a window box. It should make a fine picture, no matter how small or how large.—New York Telegram.

Cash Prize.

Flatbush—He always was a lucky sort of a guy.
Bensonhurst—What's happened?
"He's got the cash prize in a lottery."
"Really?"
"Yes, he's just married money."
Yonkers Statesman.

Sad Camels.

It is a well established fact that even young camels never play. They are born sad, and thereafter their life is one protest against being made to work, although work has been their portion since the beginning of time. How largely they have been domesticated from the earliest times we know from the statement that Job possessed 6,000 camels.—London Opinion.

The Clock Was All Right.

A man went into a clock store and handed out the pendulum of a clock which he wished to leave for repair. The clockmaker asked him why didn't bring the whole clock.

"The clock is all right," was the reply. "It's the pendulum that won't play. As soon as I pulled that out the room went like the very dickens."—Judge.

Equal to the Occasion.

"Did you ever try to board a train asked the facetious man of the boarding house lady at breakfast.
"Oh, yes!" said the lady without suggestion of a smile. "A man named Train stopped here at one time." Yonkers Statesman.

Coming Back.

It was the beginning of their wedding trip.
"Dear," she inquired anxiously, "the excitement of leaving did you say goodby to papa and mamma?"
"No," he replied. "I said au revoir."

MONKEY ANTICS.

The Orang Outang is a Creature of Great Imitative Ability.

In hotels and private houses of India monkeys have been found that were trained to wait at table, bringing dishes and articles of food in a more or less mechanical way.

The story of the talented orang outang at Buffon, the naturalist, is classic. His creature gave visitors his arm, talked with them, showed them to the door, ate with a knife and fork and drank from a glass, poured tea into a cup, sweetened it and waited till it cooled before he drank it.

An orang outang at the Jardin des Plantes in Paris regularly unlocked with a key the door of the compartment he occupied, opened the door, looked it on the other side after he had entered and then hung the key on a nail.

Flourens relates that he once visited the Jardin des Plantes in company with an aged scholar whose appearance greatly interested this orang outang, which was at large in the rooms of the institution. THUNDERSTORMS.

Simple Scientific Explanation of How They Occur.

ELECTRICITY IN THE CLOUDS.

The Processes by Which the Masses of Unequally Charged Vapor Are United, the Lightning Flashes Generated and the Downpour Started.

Lightning is the result of electric discharges from the clouds, says the Electrical Experimenter in printing what it calls "a thunderstorm primer." Every cloud, like every other object, contains electricity. This makes no disturbance so long as the quantity contained is normal. When the quantity becomes greater than normal the object is positively charged; when it becomes less than normal the object is negatively charged. The equilibrium of the electric force in the clouds is disturbed by evaporations from the surface of the earth, by changes of temperature in the atmospheric vapor, by chemical action on the earth's surface and by the friction of volumes of air of different densities against each other.

When clouds charged with the opposite electricities approach, the forces rush toward each other and combine to restore the state of equilibrium, for all bodies charged with opposite electricities attract each other. Between the clouds is air, an excellent nonconductor, through which the electricity has to force a passage. The violence with which it does this produces the lightning and the accompanying crash of thunder.

Clouds are good conductors, while the air about them is a nonconductor; therefore the electricity accumulates in the clouds. It is probably this electricity which prevents the particles of water from uniting together and falling down in the form of rain.

Imagine two clouds near to each other in the sky, one positively and the other negatively electrified, for there cannot in all nature be such a condition as that of one body positively excited without the coexistence of another body negatively excited. If the positively charged cloud were all alone in the sky the circumjacent atmosphere would assume the negative function. But as the other cloud is near by it becomes negative, and both are mutually attracted. They approach each other until the space of air between them can no longer resist their electric tension, when the discharge takes place.

The equilibrium of the clouds being thus restored, there is nothing to keep the particles of water apart; they coalesce into drops and fall as rain.

When only the clouds are involved the equilibrium is quickly restored by a few flashes and the storm is over. When the air also is involved it continues to charge the clouds with electricity, and the discharges continue until the various strata of air are brought into their normal state.

Sometimes, when the clouds are charged with an opposite electricity to that of the earth, a discharge takes place from clouds to earth or from earth to clouds. It is only when there is a great disturbance of the electrical forces that the lightning flashes to the

LABOR AND ART CLASHED.

The Battle Was Rather One Sided and Labor Won the Night.

Among the experiences which Sir Frederick Cowen, the eminent composer, relates in his book "My Art and My Friends" is the following: Once while conducting in Melbourne a terrible noise of hammering started overhead as soon as the concert began.

"I put down my baton and stopped," writes Sir Frederick; "so did the noise. Thinking it was over, I began again; so did the noise. I then sent a messenger with a polite request that the noise should cease. After about ten minutes, during which the hammering grew more and more persistent, the messenger returned, and I said to him: 'Did you give them my message?'"

"Yes, sir."
"And what was their answer?"
"They said, 'Tell Mr. Cowen we've got our contract to finish by a certain time and we ain't going to stop for no concert or nobody.'"

"Upon this I turned to the audience and said:

"Ladies and gentlemen, as you have possibly noticed, there has been a fight between labor and art. Labor has won. I am very sorry, and I wish you all good night."

"Then I dismissed the orchestra, and there was no concert that evening."

few minutes afterward I met Captain X. in Pall Mall. I said to him, 'Well, you have made a great impression, Mr. Gladstone.' 'Have I?' he said. 'Yes,' I replied. 'He says you know more about the Caucasus than any man he ever met.' 'Well,' said Captain X., 'that is very strange, for, though I was with him for three-quarters of an hour, I made only three observations.'

Leather Medals.

Leather medals were originally conferred as a genuine mark of honor. When King John of France, captured at Agincourt, was forced to pay to Edward III. of England a ransom of 3,000,000 gold crowns to effect his release he was left without precious metal for coins or decorations. So he found it necessary to pay the palace expenses with leather money. He also used leather medals when he wished to confer honor on some nobleman. The custom quickly arose of presenting leather medals as a burlesque distinction.—American Boy.

Discretion.

"Mother"—Elsie's eyes were round with horror—"that little boy next door just said the awfulest thing."

"Come tell mother, dear."

"Oh, I couldn't possibly tell you; it was too awful."

"Elsie, tell me instantly."

the old building is begun Aug. 7, 1889. The present structure was formally opened June 1890.—Argonaut.

Health For Canaries.

into drops and rain at last. When only the clouds are involved the equilibrium is quickly restored by a few flashes and the storm is over. When the air also is involved it continues to charge the clouds with electricity, and the discharges continue until the various strata of air are brought into their normal state.

Sometimes, when the clouds are charged with an opposite electricity to that of the earth, a discharge takes place from clouds to earth or from earth to clouds. It is only when there is a great disturbance of the electrical forces that the lightning flashes to the earth or vice versa.

The flash and the thunder peal are simultaneous, and we see the one before we hear the other because light waves move far more swiftly than sound waves. The peal of thunder is instantaneous, but comes to us as a roll through being echoed from clouds or mountains. The noise is caused by the vibrations of the air rushing to fill up the spaces where the electrical discharge has rarefied it and condensed its vapors.

Lightning is zigzag when it travels through a long distance, because it compresses the air, which interferes with its direct course. It is straight when it passes through only a short distance. It is forked when, being resisted by the air, it divides into two or three points. It is sheet when the flash is too distant to be visible, and its reflection alone is seen.

By remembering that sound travels a quarter of a mile in a second, while light travels so swiftly that we see it instantaneously, we can tell how far off a thunder clap is. If we hear a thunder clap four seconds after seeing the flash we know it is a mile away. For such calculations our own pulse is a sufficiently accurate measure of time, for the pulse of an adult beats about once a second. A person under forty should count five beats to the mile; a person under twenty should count six beats to the mile.

A Rough Criticism.

Lord Houghton's epigram on "Sordello," probably the most obscure of Browning's poems, though it has often gone the rounds, is worth recalling. Said Lord Houghton, then only Dicky Milnes, "There are but two lines in 'Sordello' I can understand—the first and last—'Who will may hear Sordello's story told' and 'Who would hath heard Sordello's story told' and both are false."

Finger Print Love.

"Why do you think you'll be happy if you marry that young man, daughter?" asked the father.

"Because, father, we've had our finger prints examined and they almost match," was the sweet young thing's reply.—Yonkers Statesman.

Let us remember that justice must be observed even to the lowest.—Cicero.

Protection.

"What's the idea of using the pronoun 'we' so often in your articles?"

"Well," replied the editor, "it's a matter of self protection. In case anybody takes offense I want to sound as much as possible like a crowd."—Philadelphia Record.

Tempus Fugit.

"I want a warrant for the arrest of Father Time."

"What's the charge?"
"Outrageous and continuous violation of the speed laws."—Judge.

"Yes, sir."
"And what was their answer?"
"They said, 'Tell Mr. Cowen we've got our contract to finish by a certain time and we ain't going to stop for no concert or nobody.'"
"Upon this I turned to the audience and said:
"Ladies and gentlemen, as you have possibly noticed, there has been a fight between labor and art. Labor has won. I am very sorry, and I wish you all good night."
"Then I dismissed the orchestra, and there was no concert that evening."

FIRE RISKS ON FARMS.

Safety First Should Be as Much the Rule There as Elsewhere.

A contributor to Farm and Fireside shows how appalling fire risks are on farms. He tells how to reduce some of these fire risks and writes in part as follows:

"The inveterate smoker is about as dangerous as a walking stick of dynamite. It makes me shudder to see a man smoking around the farm buildings. One man I know never will forget the way he was run off the farm when I caught him smoking a cigarette while stacking hay."

"Another dangerous practice of which the average man is guilty is that of carrying ordinary matches loose in his pockets. He should carry either safety matches or keep the ordinary kind in a metal box."

"On most farms the lantern is still the usual light for working about the buildings after dark. A good way to keep it clean and safe is, first, to take out the burners and clean them by boiling in strong soapsuds. This will keep the ventilating passages of the burner working properly. Then wipe all leaking or spilled oil off the base."

"Never set a lantern down. Either hold it or hang it up. Then when it is accidentally struck it will swing instead of upsetting."

A Gladstone Anecdote.

Lord Alverstone tells this anecdote of Gladstone in his "Recollections."
"Mr. Gladstone was very much interested in the Caucasus. I had a friend, Captain X., who had recently come home from that district, and I gave him a letter of introduction to Mr. Gladstone. A few days later I met Mr. Gladstone in Parliament street. He stopped me and said, 'Your friend, Captain X., knows more about the Caucasus than any man I ever met.' A

expenses with leather money. He also used leather medals when he wished to confer honor on some nobleman. The custom quickly arose of presenting leather medals as a burlesque distinction.—American Boy.

Discretion.

"Mother"—Elsie's eyes were round with horror—"that little boy next door just said the awfulest thing."

"Come tell mother, dear."

"Oh, I couldn't possibly tell you; it was too awful."

"Elsie, tell me instantly."

Elsie backed toward the door. "I think I'd better run out in the garden and play. I feel it coming on that I'm going to tell."—New York Post.

HUMAN CREDULITY.

Millions Are Taken Every Year From the Gullible by Sharpers.

Human credulity passes all limitations. Before me lies a newspaper story from Chicago: A man was on the way to a savings bank to deposit \$145. Two smiling strangers met him, fooled him with the story that they had "a magic handkerchief" which would double the stranger's money if he would fold his bank bills within it. After the operation the strangers told him to watch the handkerchief and see his money grow. They disappeared. They had his money and the handkerchief contained waste paper. Does this sound impossible?

Here is another story, even more improbable, but true. In New York a company appropriating the name of a well known corporation advertised to sell its shares at a bargain, and fixed a price that was just twice the stock market price. A circular was sent to the Italian quarter intimating that a great opportunity was presented for workmen to secure an interest in a wonderfully prosperous railway, that only a few shares could be had and that they must be bought at once. A rush was made for the stock, although every daily paper printed the quotation of the same security at half the price at which the swindlers were offering it. The police put an end to the game.

If people are so credulous is it surprising that the postoffice authorities report that \$150,000,000 a year is taken from the gullible by dealers in fake securities? If Wall street did this kind of wretched business it would deserve reprobation.—Leslie's Weekly.

BAPTISM INTO CHRIST WHAT DOES IT MEAN?

Only Spirit-Begotten Can Comprehend Spiritual Things.

Each Must Make His Own Calling and Election Sure—Baptism Into Christ's Death Not Complete Until Life's Close—Results of Spiritual Illumination—Membership in Christ's Body.

PASTOR RUSSELL

Providence, R. I., Sept. 26.—Pastor Russell delivered a very impressive discourse here today from the text, "By one Spirit we are all baptized into one Body."—1 Corinthians 12:13.

The speaker showed that true Christians are doubly blessed: first, by possessing the hearing ear; and secondly, by having the Divine favor in that God has made all the arrangements whereby they might receive the begetting of the Holy Spirit. Each one must make his own calling and election sure. God does His part in leading and in making up for all blemishes, through Christ. The primary qualification that God requires is heart loyalty. True Christians have this loyalty at the beginning, and must maintain it throughout their course, if they would make their calling and election sure.

While it is a good thing to say, "I have made a full consecration to God," yet that consecration must continue. The same spirit that led one to consecrate himself must remain until the completion of his baptism. The speaker demonstrated that baptism is not complete when one takes the step of entire consecration. He cited our Lord's case. When Jesus drew near the close of His ministry, three and a half years after His baptism in Jordan, He said, "I have a baptism to be baptized with, and how am I straitened until it be accomplished!" (Luke 12:50.) On the following day it was completed; and the Cross He exclaimed, "It is finished!" So the baptism of the true Christian will be finished only in death.

"The Heavens Were Opened Unto Him."

The Pastor next discussed the illumination of mind which accompanies the begetting of the Holy Spirit. After Jesus had been baptized of John, the Holy Spirit descended upon Him like a dove, "and the heavens were opened unto Him." That is, the entire Old Testament opened up to His understanding as never before. Immediately after this, His mind being active, He was driven into the wilderness by His own spirit, to think over these hitherto obscure Scriptures; and there He had a forty-day Bible study. During that period He apparently did not even become hungry.

Doubtless one of the subjects about which He thought was the Passover. What did it mean? He was passed over? Whom did the lamb typify? What did the coming out from Egypt prefigure? What the overthrow of Pharaoh and his hosts? What the giving of the Law at Mount Sinai, the wilderness journey, the entrance into Canaan?

THE MARKETS

CHICAGO, Oct. 11.—Progress of the Teutonic advance toward the Dardanelles had a distinct effect here today as an influence tending to lift the price of wheat. After an almost continuous upward movement, the market closed nervous, 3c to 3½c higher, with December at \$1.04½ to \$1.05, and May at \$1.06 to \$1.06½. Other leading staples, too, all showed gains—corn, ¾c to 1½c; oats, ¾c to 1c, and, provisions, 10c to 45c.

No. 1, per ton, \$16 to \$17.50, track, Toronto.	
No. 2, per ton, \$13 to \$14, track, Toronto.	

WINNIPEG GRAIN MARKET.

WINNIPEG, Oct. 11.—The grain exchange was officially closed there was a great amount of business done on the curb. The market was a broadly built one throughout the morning. The first curb bid on Winnipeg Oct. was 93½c, and during the morning it sold up to 96½c to 96¾c. The strength was due to a jump in cables and an active demand.

Cash quotations: No. 1 northern, 97½c; No. 2 do., 95½c; No. 3 do., 92½c; No. 4, 86c.	
Oats—No. 1 C.W., 41½c; No. 2 C.W., 39½c; No. 3 C.W., 37½c.	
Barley, No. 3, 55c.	
Flax, No. 1 N.W.C., \$1.62½; No. 2 C.W., \$1.59½.	

CATTLE MARKETS

UNION STOCK YARDS.

TORONTO, Oct. 11.—Receipts of live stock at the Union Yards were 4,681 cattle, 1,383 hogs, 2,032 sheep and lambs, and 250 calves.

Butchers' Cattle.
Choice heavy steers at \$7.75 to \$8; best butchers' cattle at \$7.40 to \$7.60; good at \$7.75 to \$7.25; medium at \$6.25 to \$6.75; common at \$5.75 to \$6.25; light steers

PASTURING YOUNG CLOVER.

Overpasturing during the fall is a fruitful cause of failure with the clover crop. Many farmers who have succeeded in getting a good growth of young clover cannot resist the temptation to turn their stock on to it after harvest, allowing the animals to eat it down as close as they can. This is a great mistake, as the young plants need all their leaves at that time to gain strength for the next season's growth and to protect them from being winter killed. If there is any danger of the clover becoming so far advanced as to form heads it would be better to run a mowing machine over the field, setting it to cut as high as possible, so as not to injure the crowns of the clover plants. By removing the dividing board the clover will not be left in bunches, but will be spread evenly over the field. The ground is thus cleaned of weeds which may have sprung up since cutting the grain, and a mulch is formed that will aid in protecting the young plants during the winter. After the grain has been removed it pays to turn in a few hogs or other stock for a week or ten days in order that the waste grain may be cleaned and thus saved, but don't pasture the young clover continuously from that time until late in the fall if a good growth of clover is wanted the following spring.

SUMMER PRUNING OF BERRIES

Doing This Work in Good Season Conserves Strength of the Plants.

The summer pruning of raspberries and blackberries—that is, cutting back the wood of this year's growth to keep it down low enough so the fruit can be conveniently reached when ripe next year—will cause the plants to send out lateral branches. Do this pruning at once in order to force early growth so the branches will mature early and growth be checked in the autumn. Winter injury will result from the late pruning, as it does not start growth early enough to allow the wood to ripen before cold weather, which is likely to kill the plants. Whole fields of caneberrys have been ruined by too late pruning. Pruning early permits the work to be done easily and conserves the strength of the plants.

Raspberries and blackberries allowed to run wild soon exhaust themselves to producing cane and will only produce a few berries on the end of the cane. A red raspberry cut back bears its fruit just back of where it was nipped and on the short branches that shoot out from the main stem.

Shower Bath in the Barn.

About the greatest comfort in the busy season is a convenient place to bathe. For those who are not fortunate enough to have a porcelain lined bathtub an excellent substitute may be made in the corner of the barn, provided water pipes are installed by the aid of windmill or engine power.

FOR CLOVER ON THIN SOILS

Ohio Farmers Have Been Using For Securing Stands With Success

A number of years the best fall in a certain portion of Ohio have been using straw to secure a stand of clover in a manner which is both unique and positively astonishing in its results. Independent of all agricultural colleges or experiment stations, some awake man in that community discovered that by spreading straw or wheat in the fall soon after sowing could the following March secure a stand of clover without fail.

It all happened from the fact some keen observer whose eyes have been sharpened by years of close study of the big book of nature as seen between the plow handles had no that where there was straw protecting the thin, worn soils on the hillside young clover plants would hold their own and develop, where on the clay spots where there was no straw the young plants would not grow. This led to the spreading straw wherever the man wanted clover, and he noticed that year after year he secured stands of clover on the hillside with his wheat, where otherwise would have secured nothing.

For twelve years he kept this up until one day a man from the experimental station happened to discover his "secret" and gave this information to the rest of the world. It is scarcely known to fail and should be followed by the man who has trouble getting a stand of clover.

New Hay Stacker.

A new idea for hay stackers has been invented by a young western farmer by which the trouble from wind has been overcome. This stacker is furnished with a "trip" apparatus which automatically trips the hay to any position of the stack, doing away to a great extent with the work with hand fork. When the hay season

over the stacker may be used as a wagon, hauling the silage from fields.

Another feature of the new stacker is that it has four wheels and is constructed that hay can be loaded on the side of steep slopes without danger of upsetting.

Farmer's Worst Enemy.

Weeds are the worst enemy of a farmer who is farming under him rainfall, according to a recent bulletin of the agricultural experiment station of Nebraska. It says:

"In 1907 a small tract of land kept thoroughly cultivated until middle of June; then one-half of it was allowed to become weedy, while the other half was kept cultivated. During the latter part of September moisture determinations were made to a depth of three feet on each portion of the tract. It was found that the weedy half had lost one-half inch of water had been used from the upper three feet of soil by allowing the weeds to grow."

to the wilderness by his own sacrifice to think about these hitherto obscure Scriptures; and there He had a forty-day Bible study. During that period He apparently did not even become hungry.

Doubtless one of the subjects about which He thought was the Passover. What did it mean? He was passed over? Whom did the lamb typify? What did the coming out from Egypt prefigure? What the overthrow of Pharaoh and his hosts? What the giving of the Law at Mount Sinai, the wilderness journey, the entrance into Canaan? (1 Corinthians 10: 1-11.) We would not have known these things had not the Holy Spirit through the Apostles shown them. understood not these wonderful types.

Doubtless He also thought on the Psalms and the prophecies. He saw that He was to be the antitypical Passover Lamb (Isaiah 53:7); that He was to let evil men take His life from Him and was not to interpose, not even ask God to hinder them. Doubtless He considered the typical Atonement Day—the bullock, the Lord's goat, the scape goat, the burning of the fat, etc., upon the brazen altar, the sprinkling of the blood within the Most Holy, the burning of the carcass without the camp, etc. Then He saw that these types were to be fulfilled in Himself and His followers.—Luke 24:27; Hebrews 13:11-13.

The Church Following His Steps.

The remainder of the discourse explained how the Church throughout the Gospel Age has followed her Redeemer. To each consecrated Christian is imputed whatever per cent. of Christ's merit is needed to make up whatever each lacks of perfection, such as Adam had before he fell. The one having but ten per cent. needs at the Lord supply ninety per cent. The one having thirty-five per cent. needs sixty-five per cent. Where the greater is the need, grace so much more abounds.—Romans 5:19-21.

The word Christ was shown to be not merely a personal name, but the name of an Office. Jesus is the Head of The Church; the Church is the Body. St. Paul knew that to gain membership in the Body of Christ he must give up everything. But he counted all earthly interests but loss and dross compared with winning a place in The Christ.—Philippians 3: 1-11.

St. Paul's hope was to attain to the First Resurrection. The Body of Christ are to share the same resurrection that Jesus had. The Apostle mentions the terms: "That I might know Him and the power of His resurrection, and the fellowship of His sufferings, being conformed unto His death." The Church class have been redeemed from the Adamic death penalty, and are dying voluntarily with Jesus, having given up all earthly interests, to share His nature and His glory.

Loyalty.

One ounce of loyalty is worth a pound of cleverness.

Why He Failed.

"I understand his marriage was a failure."

"Yes; he tried to run it the way he ran his business."

"How do you mean?"

"He was never in the office."—Detroit Free Press.

Gentle Gertrude.

Penelope—Gertrude is a gentle creature, isn't she? Percival—Yes; instead of whipping the cream she just scolds it.—Youngstown Telegram.

It belongs to great men to have great defects.—French Proverb.

CATTLE MARKETS

UNION STOCK YARDS.

TORONTO, Oct. 11.—Receipts of live stock at the Union Yards were 4,681 cattle, 1,383 hogs, 2,032 sheep and lambs, and 250 calves.

Butchers' Cattle.

Choice heavy steers at \$7.75 to \$8; best butchers' cattle at \$7.40 to \$7.60; good at \$6.75 to \$7.25; medium at \$6.25 to \$6.75; common at \$5.75 to \$6.25; light steers and heifers at \$4.75 to \$5.50; choice cows at \$6.25 to \$6.50; good cows at \$5.75 to \$6.25; medium cows at \$5.50 to \$5.75; common cows at \$4.50 to \$5.50; canners and cutters at \$3.25 to \$4.25; light bulls at \$4.10 to \$4.60; heavy bulls at \$5 to \$6.75.

Stockers and Feeders.

Choice feeders, 900 lbs., at \$6.50 to \$6.65; good feeders, 50 to 900 lbs., at \$6 to \$6.50; good stockers, 700 to 900 lbs., at \$5.75 to \$6; stockers, 600 to 700 lbs., at \$5 to \$5.50; common stocker steers and heifers at \$4 to \$4.75; yearlings, 600 to 650 lbs., at \$5.75 to \$6.25; selected reds and roans for export, all dehorned, 14c to 1/2c per lb. advance on above prices.

Milkers and Springers.

Choice milkers and springers at \$90 to \$100; good cows at \$70 to \$85; common cows at \$45 to \$65.

Veal Calves.

Choice veal calves at \$10 to \$11.50; good at \$8 to \$9; medium at \$6.50 to \$8; common at \$5.50 to \$6.50; grass at \$4.50 to \$5.50.

Sheep and Lambs.

Light sheep at \$5 to \$6.25; heavy sheep at \$5.50 to \$6; lambs at \$8.25 to \$8.75; cull lambs at \$7 to \$7.75.

Hogs.

Selects at \$10 to \$10.25 off cars, 20.85 fed and watered and \$9.50 f.o.b.; 50c is being deducted for heavy, fat hogs and thin, 10c for hogs; \$2 off for sows and \$4 off for stags from prices paid on 80 cars.

MONTREAL LIVE STOCK.

MONTREAL, Oct. 11.—At the Montreal Stock Yards, the feature of today's trading was the good demand for canning stock from the U. S., the prices for such stock showing an increase of 25c per cwt.

The tone of the market for lambs is firm at the advance in prices noted a week ago. Ontario lambs sold at \$8 to \$8.25 and Quebec, \$7.50 to \$7.75 per cwt. Sheep in fair demand, good demand, and sales of milked stock were made at 8c to 9c per pound, and grass fed at 5c to 7c.

Hogs strong with prices 10c to 25c higher. The supply was larger, for which there was a good demand from packers, and an active trade was done in selected lots at \$10.25, and sows at \$8.25. Stags, \$5 to \$5.10 per cwt., weighed off cars.

Butchers' cattle, choice, \$7.50 to \$7.75; do, medium, \$6.50 to \$7; do, common, \$5 to \$6; canners, \$3.15 to \$4.25; butchers' cattle, choice cows, \$6.50 to \$6.75; butchers' cattle, medium, \$5.50 to \$6.25; do, bulls, \$4.50 to \$6.50; milkers, choice, each, \$80 to \$85; do, common and medium, each, \$70 to \$75; springers, \$60 to \$65; sheep, ewes, \$5.25 to \$5.50; bucks and culls, \$4.50 to \$5; lambs, \$7.50 to \$8.25; hogs, off cars, \$10.25; calves, \$5 to \$9.

EAST BUFFALO LIVE STOCK.

EAST BUFFALO, Oct. 11.—Cattle—Receipts, 5400 head; fairly active; prime steers, \$9.25 to \$9.50; shipping, \$8.25 to \$9; butchers, \$6.75 to \$8.65; heifers, \$5.75 to \$8.00; cows, \$3.25 to \$7; bulls, \$4.50 to \$7.25; stockers and feeders, \$5.75 to \$7.75; stock heifers, \$5 to \$5.50; fresh cows and springers, \$5 to \$10.

Hogs—Receipts, 14,000 head; active; heavy and mixed, \$9 to \$9.10; yorkers, \$8.50 to \$9; pigs, \$8 to \$8.25; roughs, \$7.50 to \$7.75; stags, \$5 to \$6.25.

Sheep and lambs—Receipts, 10,000 head; active and steady; lambs, \$5 to \$9.25; yearlings, \$4.50 to \$7.50; wethers, \$6.25 to \$6.50; ewes, \$3 to \$6; sheep, mixed, \$6 to \$6.25.

Addison and "Clio."

Joseph Addison, the English essayist, used the pseudonym "Clio." When he wrote a manuscript in the city he annotated it with a "C." when in London, "L." when in Islington, where he lived, "I." and when in his office, "O." the whole spelling Clio.—London Express.

Lopsided Flight.

Aid (riding furiously up)—General, the enemy has captured our left wing. What shall we do? General—Fly with the other.—Boston Transcript.

Shear the sheep, but don't flay them. —Spanish Proverb.

came. A red raspberry cut back bears its fruit just back of where it was nipped and on the short branches that shoot out from the main stem.

Shower Bath in the Barn.

About the greatest comfort in the busy season is a convenient place to bathe. For those who are not fortunate enough to have a porcelain lined bathtub an excellent substitute may be made in the corner of the barn, provided water pipes are installed by the aid of windmill or engine power. Have the faucet placed overhead, and

above a zinc lined box. From the bottom of the box a ring shaped perforated pipe should protrude, under which the bather stands. With a platform of slats to stand on the water can easily be made to drain off properly. Water stored in high tanks is of the right temperature to bathe in during the hot summer.—Farm Plug-ress.

Birds and Insects.

Within certain limits birds eat the kind of food that is most accessible, especially when their natural food is scarce or wanting. Thus they sometimes injure the crops of the farmer who has unintentionally destroyed their natural food in his improvement of swamp or pasture. Most of the damage done by birds and complained of by farmers and fruit growers arises from this very cause. The berry bearing shrubs and seed bearing weeds have been cleared away, and the birds have no recourse but to attack the cultivated grain or fruit which have replaced their natural food supply. The great majority of land birds subsist upon insects during the period of nesting and molting and also feed their young upon them during the first few weeks. Many species live almost entirely upon insects, taking vegetable food only when other subsistence fails. It is thus evident that in the course of a year birds destroy an incalculable number of insects, and it is difficult to overestimate the value of their services in restraining the great tide of insect life.

Cautious.

Higgs—Crooke is a criminal lawyer isn't he? Diggs—He's a lawyer, but as to his being criminal, I think he's too careful to quite overstep the line.—New York Sun.

God gives every bird its food, but does not throw it into the nest.—J. G. Holland.

SHILOH
quickly stops coughs, cures colds, and heals the throat and lungs. 25 cents.

of the agricultural experiment station of Nebraska. It says:

"In 1907 a small tract of land kept thoroughly cultivated until middle of June; then one-half c was allowed to become weedy, and the other half was kept cultivated. During the latter part of September moisture determinations were made at a depth of three feet on each part of the tract. It was found that t and one-half inches of water had l used from the upper three feet of by allowing the weeds to grow. portion which was kept cultivated at the end of the season, practic all the water it could carry, while portion where the weeds had gr was as dry as it would have been if it produced a crop of grain."

Similar results were obtained f experiments in 1908, 1911, 1912 1913.

A FEW CANNING HINTS.

Have the canning plant properly stalled before the fruits and vegeta begin to ripen. See that the cans, belis, cases, solder, flux, etc., are dered immediately.

Be sure to order the hole and cans and specify in your order i you want solder hemmed caps. O the enamel cans for fruits if you w to preserve the color, flavor and qu ty of the product.

The soldering irons should be p uly tinned if you wish to do a smc job of soldering. This is done by h ing the irons, then filing them u they are bright. The irons are r dipped in a zinc solution, then rub in sal ammoniac, to which solder been added.

When the cans are placed in the torts keep up the pressure as rec mended and do not record the time til the thermometer registers the gree of heat recommended for handl the various products.

Feed Table For Poultry.

I use in my henhouse a table or pl form on which the drinking vess and the food and other hoppers l placed. This table is in the middle the house and is two and one-h feet high. Both sides of it are fit with nest boxes that can be pulled and closed. The boxes are a f square and ten inches deep. The part of the box is boarded up th

inches, which leaves an opening i the hen to enter the nest from l neath the table.

Over each nest a door is cut thro the top of the table and hinged place, thus making it convenient gather the eggs without pulling c the box. The advantages of such arrangement are: The eggs can gathered without stooping, the ne are dark, no floor space is utilized, t food and drinking water are kept cl the nests can be taken out and clean with little trouble.—Correspondent Farm and Home.

FOR CLOVER ON THIN SOIL.

Ohio Farmers Have Been Using Straw For Securing Stands With Success.

A number of years the best farmers in a certain portion of Ohio have been using straw to secure a stand of clover in a manner which is both unique and positively astonishing in its results. Independent of all agricultural colleges or experiment stations, some wise man in that community discovered that by spreading straw on his wheat in the fall soon after sowing he could the following March secure a stand of clover without fail.

It all happened from the fact that some keen observer whose eyes had been sharpened by years of close study of the big book of nature as seen between the plow handles had noticed that where there was straw protecting the thin, worn soils on the hillside the young clover plants would hold their own and develop, where on the same lay spots where there was no straw or rush the young plants would never grow. This led to the spreading of straw wherever the man wanted clover, and he noticed that year after year he secured stands of clover on fields with his wheat, where otherwise he would have secured nothing.

For twelve years he kept this up until one day a man from the experiment station happened to discover his "discovery" and gave this information to the rest of the world. It is scarcely ever known to fail and should be followed by the man who has trouble getting a stand of clover.

New Hay Stacker.

A new idea for hay stackers has been invented by a young western farmer by which the trouble from wind has been overcome. This stacker is fitted up with a "trip" apparatus which automatically trips the hay to any portion of the stack, doing away to a great extent with the work with the hand fork. When the hay season is

over the stacker may be used as a silo wagon, hauling the silage from the fields.

Another feature of the new stacker is that it has four wheels and is so constructed that hay can be loaded on the side of steep slopes without danger of upsetting.

Farmer's Worst Enemy.

Weeds are the worst enemy of the farmer who is farming under limited rainfall, according to a recent bulletin of the agricultural experiment station of Nebraska. It says:

"In 1907 a small tract of land was kept thoroughly cultivated until the middle of June; then one-half of it was allowed to become weedy, while the other half was kept cultivated. During the latter part of September moisture determinations were made to a depth of three feet on each portion of the tract. It was found that three and one-half inches of water had been used from the upper three feet of soil allowing the weeds to grow. The portion which was kept cultivated had

USE DIRECT LIGHT FOR NEEDLEWORK.

If you value your eyesight never attempt to do darning or other fine needlework by anything except a strong, direct light.

Although the new indirect lighting, with its soft shadow, is ideal for most kinds of work, it is not the best for sewing.

For that you will get the best results with the least eye strain only from a strong, direct light with its harsh shadows.

The reason of this is that the discrimination of detail under such circumstances as are found in sewing is dependent almost entirely either on shadow or on the direction of the light.

Where the surface of an object is uneven, but uniform in color, the only way in which the unevenness can be shown up is by differences in the illumination of such surfaces caused by the different angles which they present to the incident light. If the unevennesses are very deep they will be shown up by the shadows which are thrown up by the raised portions on to the surrounding surfaces.

For instance, the embossed lettering used on some note paper depends entirely on this action, and a sculpture in bas-relief must obviously present a very different appearance according as it is illuminated by unidirectional light at glancing incidence or by light from a large source striking it mainly at normal incidence.

The question has a wide practical application in working on fabrics of one color with no natural contrasts. A person doing needlework with such materials depends for the discrimination of the detailed strands of the fabric on the small shadows cast by one strand on to the next and on the varying brightness over the curved surfaces of each individual strand. Both these factors depend on the unidirectional character of the light incident on the material, and the inefficiency of indirect light for such work is most marked.

Hints for the Needle Worker

Marguerite Lace and Insertion.

Abbreviations: ch., chain; d.c., double crochet; tr., treble; l.t., long treble; d.l.t., double long treble.

Most simple to crochet, yet so very effective are these wheels when joined as an insertion for trimming casement window curtains, pillowslips, tray cloths, etc. Our design shows a pretty curtain for a window.

This lace is worked in crochet cotton No. 24 with a No. 5 steel hook. Begin with the lace. For the first flower work 5 ch., join into a ring by a slip stitch.

First round—4 ch. for long treble, 2 l.t. (cotton twice over needle) over the ring (keep the first two stitches on the needle and work them off with the third), * 5 ch., 3 l.t. over ring, work them off in the same way as first group; repeat from * six times.

Second round—Into each of the eight spaces of five chain work 1 d.c., 6 tr., 1 d.c. This completes one pattern. Work a second pattern and join to the first by the third treble on one pattern to the same treble on first pattern. Join them by two leaves. Leave two

PATTERN AND METHOD OF WORKING.

free leaves on both sides of joining. On the corner leave four free leaves on the outer edge.

The heading—1 d.c. into the first of two leaves on inner edge, 5 ch., 1 d.c. on next leaf, * 8 ch., 5 d.c. on first leaf on next pattern, 5 ch., 1 d.c. on second leaf on same pattern; repeat from *. On the corners, after working 5 ch., 1 d.c. on last leaf before corner, work 3 ch., 1 d.l.t. (cotton three times over needle) between two leaves on corner pattern, 3 ch., 1 d.c. into first leaf on next pattern.

Third round—* 9 d.c. over first space of eight chain, 4 ch. Turn back over four double crochet, draw the cotton through the fifth double crochet, over this small space work 8 d.c., 5 d.c. over same space as first nine double crochet were worked, 6 d.c. over next space of chain, 4 ch. Turn back over four double crochet, draw the cotton through the fifth double crochet and work 8 d.c. over this space; repeat from *. At the corners work 5 d.c. over

Are you Bilious?

Don't let it run too long, it will lead to chronic indigestion. In the meanwhile you suffer from miserable, sick headaches, nervousness, depression and sallow complexion. Just try CHAMBERLAIN'S STOMACH & LIVER TABLETS. They relieve fermentation, indigestion—gently but surely cleanse the system and keep the stomach and liver in perfect running order.

TAKE THESE

BUTTON NOVELTIES.

Summer Ruffles Past;
Fall Assumes Buttons.

ATTRACTIVE FASTENERS.

This cartwheel and the big whirl are suitable for coats. The smaller metal buttons, lacquered colors, will brighten up dark dresses for little girls' school days just ahead.

Odds and Ends.

To remove ink stains from a book apply oxalic acid on the tip of a camel's hair brush and soak up with blotting paper.

Add a tablespoonful of table salt to the gasoline when sponging clothes and the rings usually left on the garments will be avoided.

The fine steel brushes used on suede shoes are much better to remove the shine from worn cloth than is pumice stone. These small brushes cost 25 cents and can be conveniently carried when traveling. Use a circular motion when brushing.

Cut pieces about two inches wide and three long from the heels of old rubbers, peel off the cloth and sew them inside the heels of your rubbers. They are rough and sticky and will cling fast to the shoe and entirely stop that disagreeable trait some rubbers have of slipping off at the heel.

That Barber Pol.

The command to Elevator barbers

of Nebraska. It says:
 "In 1907 a small tract of land was kept thoroughly cultivated until the middle of June; then one-half of it was allowed to become weedy, while the other half was kept cultivated. During the latter part of September moisture determinations were made to a depth of three feet on each portion of the tract. It was found that three and one-half inches of water had been used from the upper three feet of soil by allowing the weeds to grow. The portion which was kept cultivated had, at the end of the season, practically all the water it could carry, while the portion where the weeds had grown was as dry as it would have been had it produced a crop of grain."

Similar results were obtained from experiments in 1908, 1911, 1912 and 1913.

A FEW CANNING HINTS.

Have the canning plant properly installed before the fruits and vegetables begin to ripen. See that the cans, labels, cases, solder, flux, etc., are ordered immediately.

Be sure to order the hole and cap cans and specify in your order that you want solder hemmed caps. Order the enamel cans for fruits if you wish to preserve the color, flavor and quality of the product.

The soldering irons should be properly tinned if you wish to do a smooth job of soldering. This is done by heating the irons, then fling them until they are bright. The irons are now dipped in a zinc solution, then rubbed in sal ammoniac, to which solder has been added.

When the cans are placed in the reports keep up the pressure as recommended and do not record the time until the thermometer registers the degree of heat recommended for handling the various products.

Feed Table For Poultry.

I use in my henhouse a table or platform on which the drinking vessels and the food and other hoppers are placed. This table is in the middle of the house and is two and one-half feet high. Both sides of it are fitted with nest boxes that can be pulled out and closed. The boxes are a foot square and ten inches deep. The back part of the box is boarded up three

inches, which leaves an opening for the hen to enter the nest from beneath the table.

Over each nest a door is cut through the top of the table and hinged in place, thus making it convenient to gather the eggs without pulling out the box. The advantages of such an arrangement are: The eggs can be gathered without stooping, the nests are dark, no floor space is utilized, the food and drinking water are kept clean, the nests can be taken out and cleaned with little trouble.—Correspondent of Farm and Home.

SILK AND ROSES.

Meshed, bowknotted and rose embroidered, this hosiery matches your afternoon or evening gown in color. Satin pumps without buckles complete this nether elegance.

Fads and Fashions.

The high collar is very much here. Stockings and shoes are exceedingly gay in coloring.

Buttons are, if possible, more frequent than ever.

White net and chiffon are good for the evening dress.

The charming mode of the transparent hat continues.

Girls' middie blouses have colored smocking on them.

A new mauve blue is in favor for chemisettes and blouses.

Long waistcoats and flap pockets will be seen on autumn coats.

A dark blue serge is charming if trimmed with black taffeta.

Organdy collars and chemisettes are attractive with linen dresses.

After Motoring.

When the eyes feel tired and dull after a long ride, bathe them in luke warm water, to which a little boracic powder or witch hazel has been added.

Tactful.

A musical conductor was trying the voice of a young woman who wished to secure a place in an opera troupe. The manager was standing by. The candidate was frail and timid. She finished her song with an air of distress.

"How is it?" asked the manager unceremoniously.

The conductor caught the pleading eyes of the girl, but he had his duty to perform. He struck three notes on the piano and left the rest to the manager.

The three notes were B A D.

patter, 3 ch., 1 d. c. into first leaf on next pattern.

Third round.—9 d. c. over first space of eight chain, 4 ch. Turn back over four double crochet, draw the cotton through the fifth double crochet, over this small space work 8 d. c., 5 d. c. over same space as first nine double crochet were worked, 6 d. c. over next space of chain, 4 ch. Turn back over four double crochet, draw the cotton through the fifth double crochet and work 8 d. c. over this space; repeat from *. At the corners work 5 d. c. over each of the spaces of three chain on both sides of the double long treble on corner pattern.

For the insertion—Work the patterns and join them in the same way as for lace. See illustration for the placing of patterns for insertion. The edgings of the insertion are done in the same way as for the lace. On the outside edge of the corner pattern work 5 ch., between first and second leaves, 8 ch. between second and third, 8 ch. between third and fourth.

Pillow Slip Lace.

Abbreviations.—Ch., chain; tr., treble. First Row.—Tr. in tenth st. (ch. 3 skips 3, 1 tr. in next st.) 8 times, making 9 spaces in all; 1 tr. in last st. turn.

Second Row.—Ch. 3 tr. in second tr., 7 spaces, 5 trs., 1 space, turn.

Third Row.—Ch. 9 tr. in tr., 3 under 3 ch., 1 in each of 5 tr., 3 under 3 ch., 1 in tr., 6 spaces, tr. in last tr. turn.

Fourth Row.—Ch. 3 tr. in tr., 5 spaces, 5 trs., 1 space, 5 trs., 1 space, space 5 trs., turn.

Fifth Row.—Ch. 12, 4 trs. over 12 ch. just made 5 trs. in 5 trs., 3 under 3 ch. tr. in tr. 1 space, 13 trs., 4 spaces, tr. in last tr., turn.

Sixth Row.—Ch. 3 tr. in tr., 5 spaces, 5 trs., 1 space, 5 trs., 1 space, 5 trs., turn.

Seventh Row.—Ch. 6, 13 trs., 6 spaces, tr. in last tr., turn.

Eighth Row.—Ch. 3 tr. in tr., 7 spaces, 5 tr., 1 space, turn.

Ninth Row.—Ch. 6 tr. in first tr., 8 more spaces, tr. in last tr., turn.

Tenth Row.—Like the second row.

When you have as much as you need, break and work a pleat edge around each scallop, as follows:

Fasten thread in first space of scallop: ch. 5, 11 d. c., 5 ch., 1 d. c., 6 ch., 1 d. c., 5 ch., 1 d. c.; in next loop, ch., 5, 11 d. c., 6 ch., 1 d. c., 7 ch.; 1 d. c., 6 ch., 1 d. c., 1 in center loop; ch. 5, 1 d. c., 5 ch., 1 d. c., 6 ch., 1 d. c., in center space between two scallops, ch. 5, 1 d. c., in 1 st. loop of second scallop, etc. to end.

Baked Beets.

Beets retain their sugary, delicate flavor to perfection if they are baked instead of boiled. Turn them frequently while in the oven, using a knife, as a fork allows the juice to run out. When done remove the skin and serve with butter, salt and pepper on the slices.

Coffee Cake.

One egg, one cupful of brown sugar, one cupful of molasses, one cupful of butter, one cupful of strong coffee (cold), one-half pound of raisins, one tablespoonful of cloves, one tablespoonful of cinnamon, one nutmeg (grated), one heaping teaspoonful of soda, four or five cupfuls of flour. Mix it very stiff and bake in moderate oven one hour.

Children Cry
 FOR FLETCHER'S
 CASTORIA

cents and can be conveniently carried when traveling. Use a circular motion when brushing.

Cut pieces about two inches wide and three long from the heels of old rubbers, peel off the cloth and sew them inside the heels of your rubbers. They are rough and sticky and will cling fast to the shoe and entirely stop that disagreeable trait some rubbers have of slipping off at the heel.

That Barber Pole.

The command to Egyptian barbers to visit the dead and report on the cause of death is a reminder that barbers were formerly surgeons also. The barber's pole, in fact, had to do entirely with the surgical branch of the business, being provided for the patient to clutch tightly during the operation of "bleeding." The ornamental fillet symbolized the ribbon used to bandage the arm whence blood was taken. In England the earliest medical society termed itself the Barber-Surgeons company.

Puzzle.

I am composed of five letters. My first minus my fifth gives my second; my second plus one gives my fourth; five times my first plus five times my fifth gives my third; my whole is funny. Answer.—Comic.

Three Wishes.

Should a good fairy come this way
 And give me wishes three,
 I would not have to stop and think,
 I know just what they'd be.
 I'd wish there wasn't any school,
 So I could always play
 Out in the yard and fields and woods
 All day and every day.

I'd have a baby sister, too,
 With shiny yellow curls,
 For there is nothing quite so nice
 As little baby girls.

To Remove Discolorations.

What neat housekeeper is not annoyed when she sees on the spotless woodwork of her door or windows those long, dark scratches which reveal that some one has tried to light a match by drawing it across the paint? Here is a remedy for the marks which quite defy soap and water. Cut a sour orange or lemon in half, apply the cut half to the marks, rubbing for a moment quite hard; then wash off with a clean rag, dipping first in water to moisten it, and then in whiting. Rub well with this rag, dry thoroughly, and nine times out of ten times the ugly marks will be conquered.

All finger marks on painted walls, etc., should be rubbed off with a little damp whiting in the same way and never washed with soapsuds, which destroys the paint.

THE GRAHAM CO'Y.,
 Napanee Ont.

Edward Snider, who was demanded on a cheque forging charge, appeared before the magistrate, on Monday and pleaded guilty to the charge. He was remanded for another eight days and will be sentenced on Monday next.

Mary Elizabeth Hamilton, Yarker, aged twenty-two, died on Tuesday, in the Kingston General Hospital following an operation. She was taken to the hospital on Sunday. The remains were conveyed to Yarker on Tuesday.

Mr. Cameron, Belleville's well-known baritone and vocal teacher, will receive pupils in voice culture, and also in expression, at the studio above Smith's, Jewellers, on Monday afternoons. Mr. Cameron will be glad to consult with prospective pupils, or any interested in voice work.

The remains of the late R. Logan Roe, a former resident of Napanee, were brought here from Renovo, Pa., on Saturday evening. The remains were taken to the residence of Mr. H. B. Sherwood, and the funeral took place in St. Mary Magdalene's church, on Sunday morning at 9 o'clock. Deceased was a son of the late Alexander Roe, an ex-M.P., for Lennox county. Deceased was about fifty-two years of age.

Portions of the York road between Odessa and Napanee are a disgrace to any municipality. This is the opinion of people who have had occasion to drive over the road during the past month or six weeks. During the early months of the summer the road was in need of repair, but unfortunately the authorities evidently did not see their way clear to fix it, and for that reason it is so full of holes that it is almost an impossibility to drive an automobile through some of them. Unless the authorities get busy and have the road put in shape accidents will happen.—Whig.

Chief Barrett was in Toronto on Tuesday and brought back Hyman Gross on a charge of stealing a quantity of scrap iron, about \$100 worth, about the 26th of August last. He appeared before the magistrate on Wednesday and was remanded for eight days. The iron he is charged with stealing, is the scrap iron from the machinery in the big mill, which was purchased by Moses Ellinson and by him carted to the C.N.R. yards, to await shipment. Gross shipped it from C. N. yards under another name and sold it. Gross claims he was equally interested in the deal with Ellinson. The prisoner appeared before the magistrate on Wednesday and was granted bail to appear on Oct. 20th.

If You Want

A bargain buy VanLuven's coal. It is the best. Costs no more.

Fell into Threshing Machine.

Thursday of last week, Mr. Arch. McCracken, a farmer residing a couple of miles north of Roblin, met with a very serious accident. He was engaged at threshing on the farm of Mr. Manson York, about four miles from Tamworth, and while at work in the mow, a plank shifted, letting him through into the threshing machine. Luckily, he managed to throw himself away from the machine and landed on the barn floor, but not before he was badly cut. He received a bad gash under his shoulder blade, about six inches long, and the cap of his elbow was cut in two. Some little time elapsed before medical attendance could be secured for the unfortunate man. From latest reports Mr. McCracken is getting along as well as could be expected, and was able to be removed to his home on Tuesday. The many friends of Mr. McCracken deeply sympathize with him in his misfortune.

Mrs. W. J. Foster.
 Misses Irene Wagar and Helene O'Riordan spent Thanksgiving at the latter's home in Madoc.

Mr. Cleveland Sills is home from Oheida, N. Y., with a new Scripp-Booth Car, purchased in Detroit, Mich.

Mr. Louis Ming was home from Queen's University for Thanksgiving.

Miss Margaret Maconachie has gone to Manotick to finish her course in music.

Miss Caroline Maconachie is teaching school at Cloyne.

Mrs. Joseph Buck, of Kingston, is spending the week in town the guest of her parents, Mr. and Mrs. Nicholas Vanalstine, Mill Street.

Mr. Lammont and Mr. Dempsey, Queen's University Kingston, spent Thanksgiving with Mr. Louis Ming.

Mrs. J. A. Fraser and Mrs. Arthur Holland left last week to spend the winter in Montreal.

Mrs. G. R. Towlinson is visiting friends in Hamilton.

Mrs. Dr. T. W. Simpson spent last week with her sister in Toronto.

Mrs. Moffat and children returned last week from a visit with friends in Stratford.

Mrs. Stephen Gibson is in Toronto visiting her son James who is ill with typhoid fever.

Mrs. U. M. Wilson is spending three weeks with friends in Belleville.

Mrs. Brown, of Chicago is the guest of Mrs. F. S. Wartman, East Street.

Rev. J. H. H. Coleman is in Ottawa attending the funeral of his mother who died suddenly on Thursday morning.

Mr. D. A. Nesbitt I. P. S., spent Thanksgiving with his son Dr. Nesbitt, Lindsay.

Mrs. R. J. Delong is visiting friends in Ottawa.

Mrs. Donnelly, who has been the guest of Mrs. F. P. Douglas returned to Kingston on Saturday, accompanied by Miss Stella Douglas, who will remain in Kingston for a few days.

Mr. Percy Nesbitt attending Royal Dental College, Toronto, spent the week-end under the parental roof.

Mrs. T. B. Wallace is spending a few days in Toronto.

Mayor Gibbard returned this week from Edmonton.

Mrs. F. F. Miller is spending a few days in Toronto.

Mrs. W. R. Travers, Brockville, was the guest of Mrs. Harry Travers for Thanksgiving.

Miss Helen Herrington with a lady friend was home from St. Agnes College for Thanksgiving.

Miss Leah Sherwood and Miss Roe were home from New York for Mr. Roe's funeral.

Mrs. F. C. Bogart, Gosport, spent last week with her mother, Mrs. Wiggins.

Mr. and Mrs. Fred Haggerty returned from Ottawa on Thursday.

Miss Gertrude E. Metzler, of Albert College spent Thanksgiving in town with her parents. She was accompanied by her schoolmate, Miss Elizabeth White.

Mrs. Harcourt Acton, Gananoque, and Miss Margaret Jamieson, Ottawa, were guests of Mr. and Mrs. W. H. Kelly over Thanksgiving.

 Thursday, 8 p.m.—Welcome meeting to the new officers who will take charge of the work here.

The Verdict.

The coronor's jury empanelled to inquire into the death of Harold Hunter on Thursday last brought in the following verdict:

That Harold Hunter came to his death about 4.30 p.m., on Thursday Oct. 7th, on what is known as the Newburgh Road, about three and one-half miles from Napanee as the result of the overturning of an automobile on being crushed beneath the steering wheel of the car, when the automobile left the road. And we further find that as a result of a defect in the steering gear of the car, the car did not respond to the driver as it should, and we think that the car was being run at too high speed in going down a hill on a road comparatively new to the driver. We would recommend that the persons in charge of the county roads should take steps to provide better protection to the driving public on such pieces of road.

G. H. COWAN, Coroner,
 W. SUTTON, Foreman.

John Kelly, Marsh Hudson, D. Shangraw, R. F. Hawley, E. C. Lasher, Robt. Shetler, W. F. Finlay.
